

How can public services benefit from the CEF.AT platform

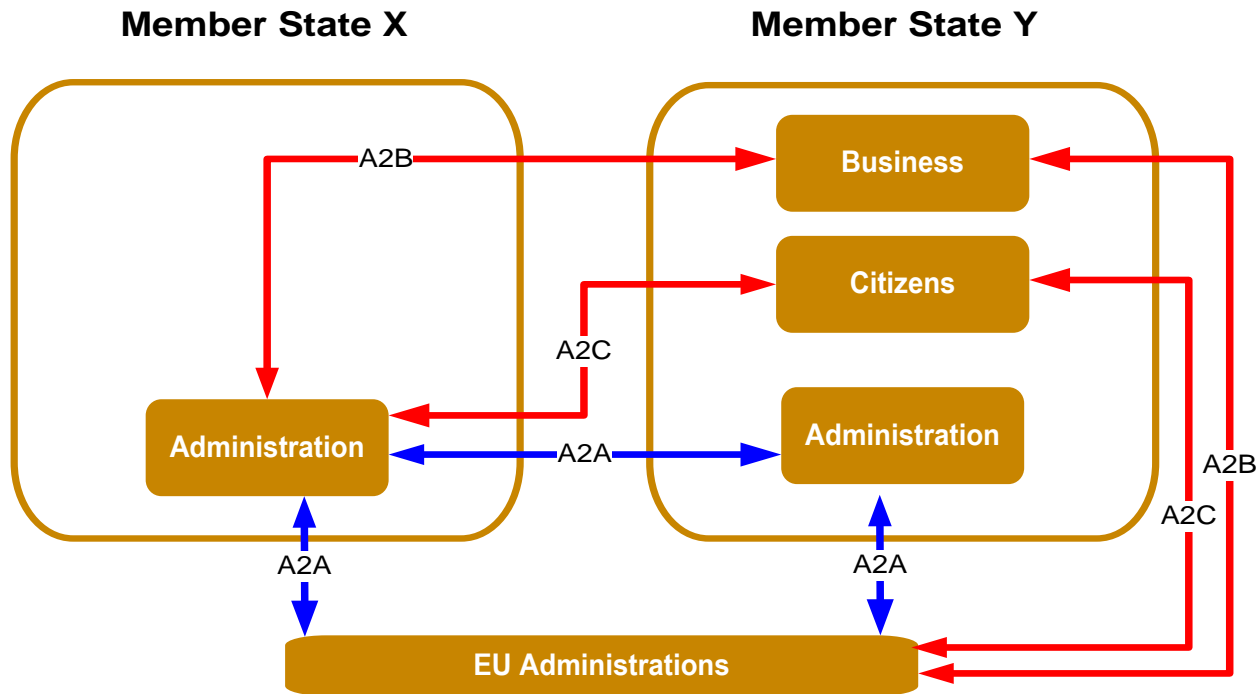

Spyridon Pilos
DG Translation, Language applications

<place>, <date>

Public services and machine translation

- *Multilingualism and machine translation*
- *Now: MT@EC*
- *Next: CEF.AT platform*

Interactions between actors in the Member States and the EU

- First type
- Second type

Vision

Wouldn't it be great if I could start *using a public service in any Member State from any place* and obtain the information *in my mother tongue*?

The role of Machine Translation

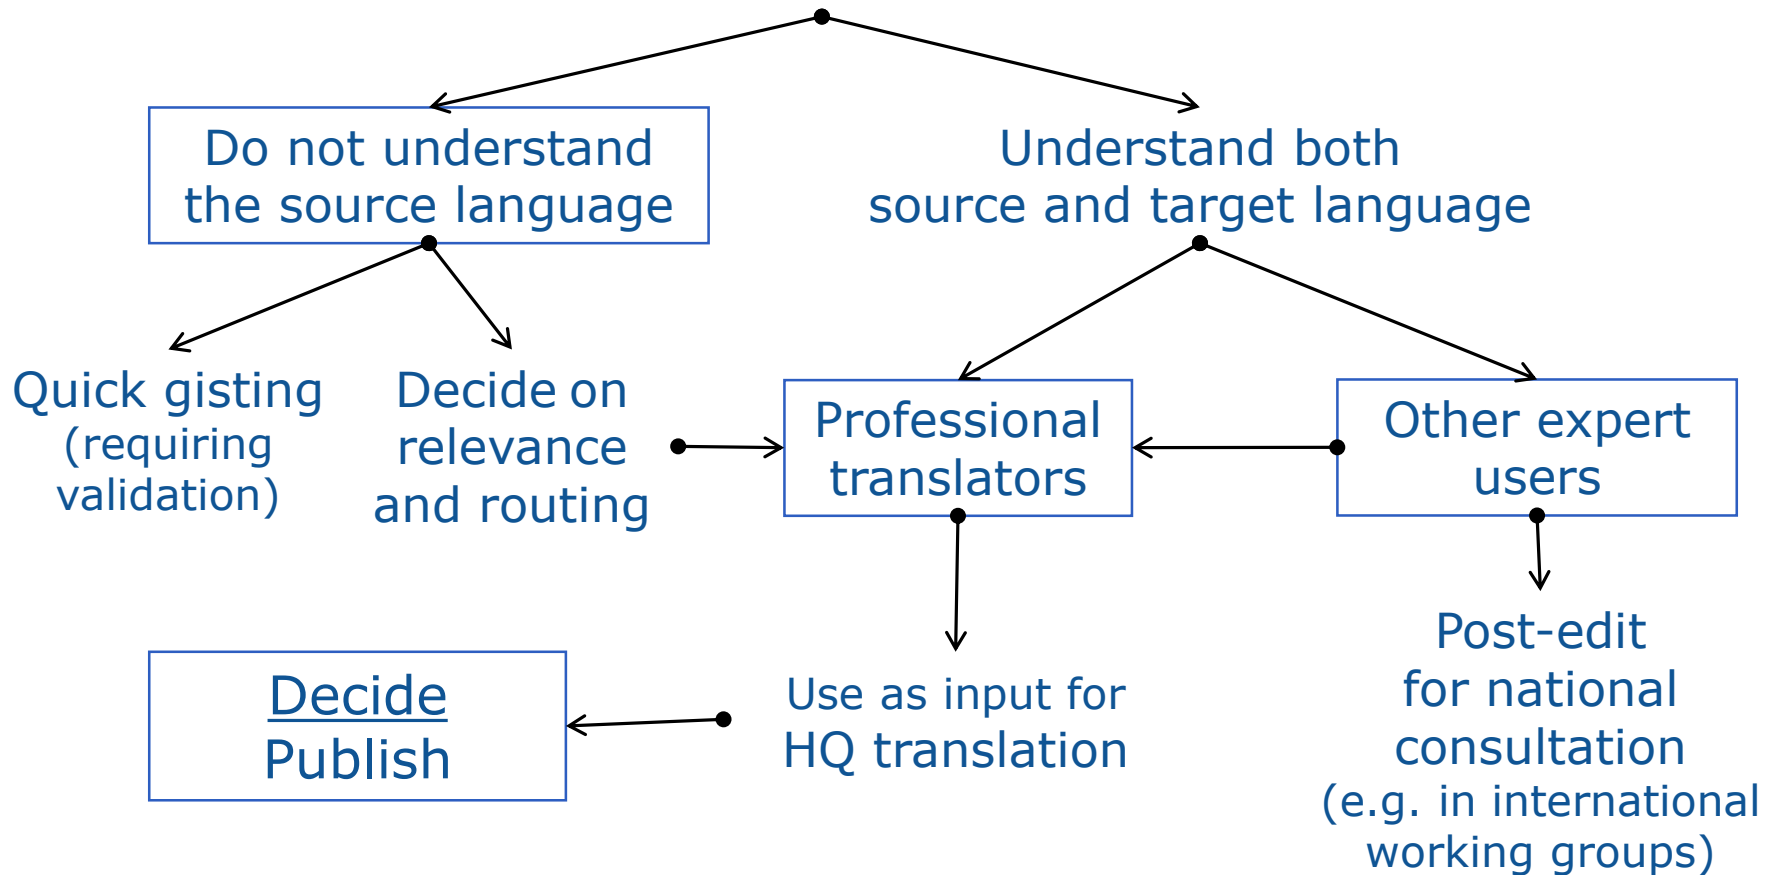

MT is the only viable solution for:

- quick and cheap **access to information** in foreign languages.
- understanding **information received** in a foreign language that otherwise could not be used or would require substantial time and costs to translate.
- making **multilingual use of websites** possible
- facilitating cross-lingual information **search** and **analytics**.

That is why machine translation (MT) is a **critically important** technology for multilingual Europe

Machine Translation users

MT@EC: already there for you!

Released : 26 June 2013

Languages: All directions between
24 EU official languages

Technology: Statistical machine translation
*using open source software Moses co-funded by
EU Framework Programmes for research and innovation*

Development by DGT between 2010-2013
co-funded by the ISA programme (action 2.8)

http://ec.europa.eu/isa/actions/02-interoperability-architecture/2-8action_en.htm

MT@EC description

Delivery: - web user interface (human to machine)
- web services (machine to machine)

Special features:

- **User interface** in 24 languages
- Source document format/formatting **maintained** *[not for pdf]*
- Specific output **formats for translation:** tmx and xliff
- Translation can also be returned by **email**
- Can translate **multiple** documents to **multiple** languages
- Indication of **quality** for language pairs (using BLEU Scores)
- **Feedback** mechanism (using EU Survey)

MT@EC security

- Secure hosting in the **EC data centre**
- Access through **ECAS** (EC Authentication Service)
- Secure document transfers :
 - over **sTESTA***, a very secure private network between public administrations in the EU, separate from the internet
 - over the **internet** (through a secure **https** connection)

** You can check if your organisation has access to sTESTA on:
<https://portal.testa.eu/jetspeed/portal/homepage/about.psml>.*

What next?

from MT@EC... to the CEF Automated Translation platform

CEF.AT will:

- build on the **existing** MT@EC service - but not be limited to it
- put emphasis on **secure, quality, customisable** MT for pan-European online services - but not be limited to them
- be a **multilingualism enabler** – not only MT

What will CEF.AT bring to users?

- *Faster and more secure translation*
 - *More pan-European public online services offering machine translation and other multilingualism possibilities, adapted to the needs of their users*
- and**
- *Better quality translation in general*
 - *Translation for specific domains*
(starting with the domains relevant for the DSIs)
- ➔ **More and better data** *are needed for all languages and for more domains.*

Currently: Generic "EU" engines

- *MT@EC built on "EU translations" (Euramis)*
- *Euramis covers all 24 languages **but** with different volumes. (ranging from 97 million segments in EN, 58 M in FR to 2.8 M in Croatian and Irish (the rest between 22 and 38 M))*
- *Euramis (and MT@EC) covers EU policies, subjects and language **but** limited everyday language*
- *MT@EC covers many domains **but** there is currently no possibility to focus on any one of them. More "in domain" data are also needed.*

Customisation for online services

connecting to the CEF.AT platform (starting from MT@EC)

Service	Description/URL/use
Europeana	The digital European Library, common, multilingual access point to digital resources of European heritage.
ODP*	The pan-European O pen D ata P ortal for accessing open data infrastructures distributed over a EU and MS data repositories.
EESSI	The E lectronic E xchange of S ocial S ecurity I nformation, a platform between 32 countries (EU+EFTA).
ODR*	The O nline D ispute R esolution platform for resolution of online contractual disputes between consumers and traders, linking all national Alternative Dispute Resolution (ADR) entities.
e-justice*	A portal which is a single point of access to law, enabling EU judicial cooperation.
SaferInternet	Services to make Internet a trusted environment for children.

* *already connected to MT@EC (generic EU service)*

European
Commission
