Financements innovants pour l'agriculture, la sécurité alimentaire et la nutrition, Ministère des Affaires étrangères et du Développement international

EXECUTIVE SUMMARY

This report is the result of a collective work carried out by the high-level expert Committee and a writing team commissioned by the Task Force on innovative financing for agriculture, food security and nutrition, by the Leading Group on Innovative Financing for Development at its 9th plenary session in Mali (Bamako) in June 2011.

The report includes an analysis of the need for investing financing dedicated to the agricultural, food security and nutrition sector, a critical review of existing and possible mechanisms and a proposed selection of avenues for the development of such mechanisms on the basis of the expertise of a high-level Committee of experts, discussions with relevant professional actors and an on-line consultation on the Global Forum on food security and nutrition (FSN Forum).

Although they are progressing, budgets for food security, including agriculture and nutrition components, in developing countries are severely constrained. Regarding the agriculture side, the dedicated Official Development Assistance (ODA) has increased in recent years, with higher amounts allocated to emerging and income countries, particularly in Sub-Saharan Africa and less developed countries. The challenge is all the more important in Sub-Saharan Africa, the continent where population growth will be the highest, where yields have tended to stagnate

Given the current trends in world population growth, particularly in developing countries, the global demand for food is expected to increase by 60 percent by 2050*.

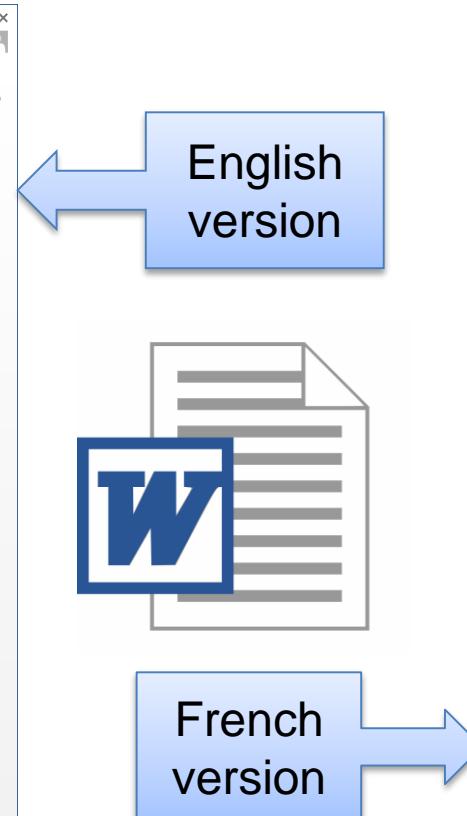

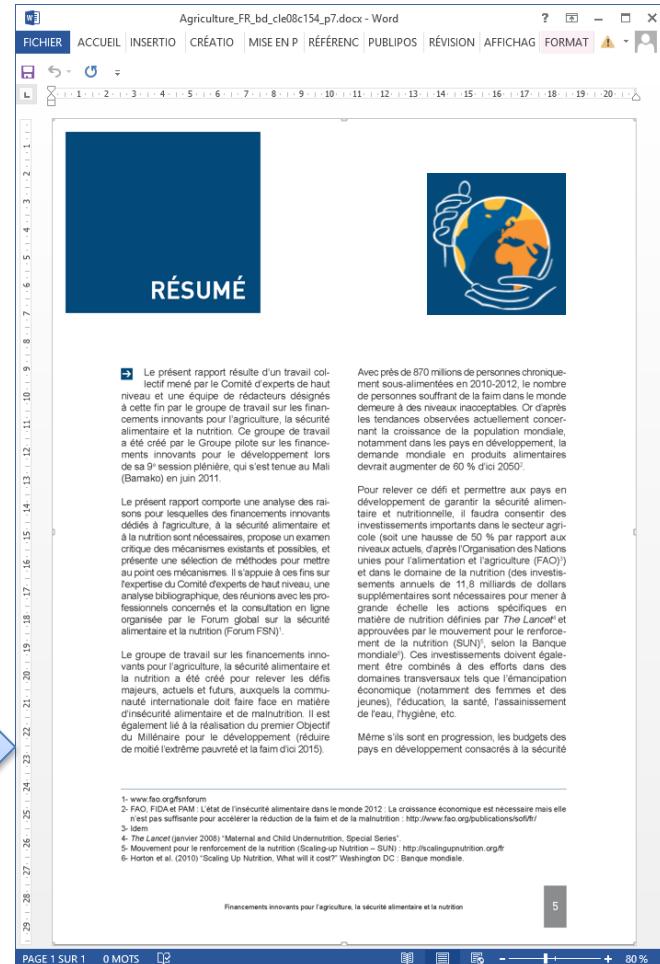

Meeting this challenge and allowing developing countries to ensure food security and nutrition imply an important investment in the agricultural sector (i.e., 50 percent more than the current level according to FAO) and in the field of nutrition**. An additional investment of USD 11.8 billion is needed to implement at scale the priority nutrition-specific interventions identified by the Lancet series*** and endorsed by the Scaling Up Nutrition (SUN) movement****, according to the World Bank*****. These investments need to be as well combined with other cross-cutting sectors such as economic empowerment (especially women and young people), education, health, water sanitation and hygiene, etc.

The setting up of the Task Force on Innovative Financing for agriculture, food security and nutrition responds to current and future crucial challenges faced by the international community regarding food insecurity and malnutrition and is related to the achievement of the first Millennium Development Goal (MDG 1) (reduction of extreme poverty and hunger by half by 2015).

With almost 870 million chronically undernourished people in 2010-2012, the number of hungry people in the world remains unacceptably high.

Innovative financing for agriculture, food security and nutrition

RÉSUMÉ

Le présent rapport résulte d'un travail collectif mené par le Comité d'experts de haut niveau et une équipe de rédacteurs désignés qui ont effectué ce travail sur les financements innovants pour l'agriculture, sécurité alimentaire et la nutrition. Or dans les tendances observées actuellement concernant la croissance de la population mondiale, notamment dans les pays en développement, la demande mondiale en produits alimentaires devrait augmenter de 60 % d'ici 2050.

Pour relever ce défi et permettre aux pays en développement de garantir la sécurité alimentaire et nutritionnelle, il faudra consentir des investissements importants dans le secteur agricole (soit une hausse de 50 % par rapport aux niveaux actuels, d'après l'Organisation des Nations unies pour l'alimentation et l'agriculture (FAO)) et dans le domaine de la nutrition (des investissements annuels de 11,8 milliards de dollars supplémentaires sont nécessaires pour mener à grande échelle les actions spécifiques en matière de sécurité alimentaire et de nutrition). Ces investissements doivent également être combinés à des efforts dans des domaines transversaux tels que l'émanicipation économique (notamment des femmes et des jeunes), l'éducation, la santé, l'assainissement de l'eau, l'hygiène, etc.

Même s'ils sont en progression, les budgets des pays en développement consacrés à la sécurité

Avec près de 870 millions de personnes chroniquement sous-alimentées en 2010-2012, le nombre de personnes souffrant de la faim dans le monde devrait augmenter de 60% d'ici 2050. Or dans les tendances observées actuellement concernant la croissance de la population mondiale, notamment dans les pays en développement, la demande mondiale en produits alimentaires devrait augmenter de 60 % d'ici 2050.

Le présent rapport comporte une analyse des raisons pour lesquelles des financements innovants dédiés à l'agriculture, à la sécurité alimentaire et à la nutrition sont nécessaires, propose un examen critique des mécanismes existants et possibles, et propose des recommandations pour améliorer au point ces mécanismes. Il s'appuie à ces fins sur l'expertise du Comité d'experts de haut niveau, une analyse bibliographique, des réunions avec les professionnels concernés et la consultation en ligne organisée par le Forum global sur la sécurité alimentaire et la nutrition (Forum FSN)***.

Le groupe de travail sur les financements innovants pour l'agriculture, la sécurité alimentaire et la nutrition a été créé pour relever les défis auxquels sont confrontés les pays en développement dans la lutte contre l'in sécurité alimentaire et de malnutrition. Il est également lié à la réalisation du premier Objectif du Millénaire pour le développement (réduire de moitié l'extrême pauvreté et la faim d'ici 2015).

Sentence aligned data from parallel documents

en	el
Greece of art and science	Η Ελλάδα των τεχνών και της επιστήμης
Greece is a place of culture, the arts and sciences.	Η Ελλάδα αποτελεί έναν χώρο πολιτισμού, τέχνης και επιστημών.
Its tradition of contribution to global cultural and scientific communities, combined with its outstanding natural beauty and excellent infrastructure, has made it an ideal place in which to hold conferences.	Η μακραίωνη συμβολή της στο παγκόσμιο γίγνεσθαι, σε συνδυασμό με το μοναδικό φυσικό κάλλος και τις άρτιες υποδομές, την καθιστούν ιδανικό τόπο διεξαγωγής συνεδρίων.
Over the last few years, Greece has more and more frequently welcomed people of letters, sciences and the arts, who have participated in symposia, conferences and exhibitions.	Τα τελευταία χρόνια, η ελληνική επικράτεια υποδέχεται όλο και συχνότερα ανθρώπους των γραμμάτων, των επιστημών και των τεχνών, οι οποίοι συμμετέχουν σε συμπόσια, συνέδρια και εκθέσεις.
Athens International Airport 'Eleftherios Venizelos', one of the most modern airports in the world in operation since 2001, greatly boosted the organization of international conferences.	Ο Διεθνής Αερολιμένας Αθηνών «Ελευθέριος Βενιζέλος», ένα από τα πλέον σύγχρονα αεροδρόμια παγκοσμίως, ο οποίος λειτουργεί από το 2001, έδωσε μεγάλη ώθηση στη διοργάνωση διεθνών συνεδρίων.
Conference tourism is extremely interdependent: it requires of course a high level of background support from the host country, and at the same time it can actively contribute to improving the overall standard of services in the region.	Ο συνεδριακός τουρισμός είναι άκρως αλληλεπιδραστικός: απαιτεί, βέβαια, ένα υψηλού επιπέδου υπόβαθρο από τη χώρα υποδοχής, ταυτόχρονα όμως συμβάλλει ενεργά στην αναβάθμιση της συνολικής ποιότητας μιας περιοχής.
It is logical that a country chosen as a conference location should be involved in the cultural 'product', giving the public, both residents and visitors, the chance to experience human achievement and innovative thought.	Είναι λογικό, ένας χώρος ο οποίος προτιμάται για τη διεξαγωγή συνεδρίων, να μετέχει προνομιακά στο πολιτιστικό «προϊόν», μιας και δίνει τη δύνατότητα σε κοινό, κατοίκους και επισκέπτες, να έρθουν σε επαφή με τα ανθρώπινα επιτεύγματα και τις καινοτομίες.
The Greece of the pre-Socratic philosophers, of the great poets, of Pheidias the sculptor and Asclepius the physician, extends its hospitality and its warmest welcome, honouring people of intellect and creativity, commerce and scientific progress.	Η Ελλάδα των προσωκρατικών φιλοσόφων, των μεγάλων ποιητών, του Φειδία και του Ασκληπιού υποδέχεται φιλόξενα και τιμά τους ανθρώπους του πνεύματος, του εμπορίου και της προόδου.
Scientific conferences in the land that gave birth to science	Συνέδρια στη χώρα που γέννησε τις επιστήμες
Greece has a large number of esteemed scientists, both here in the country and abroad. Greek scientists, with their inventions, innovations and research work, play a leading part in the international scientific community.	Η Ελλάδα διαθέτει μεγάλο και υψηλής αξίας επιστημονικό δυναμικό, τόσο εντός όσο και εκτός συνόρων. Οι Έλληνες επιστήμονες, με τις εφευρέσεις, τις καινοτομίες και το ερευνητικό τους έργο πρωταγωνιστούν στη διεθνή επιστημονική κοινότητα.
Numerous important scientific conferences take place in Greece, reflecting the significance the country places on innovative science.	Τα επιστημονικά συνέδρια που λαμβάνουν χώρα στην Ελλάδα είναι και πολλά και σημαντικά, αντανακλώντας τη σημασία που δίνει η χώρα στις καινοτόμες επιστήμες.
Medical, architectural, natural and humanistic scientific conferences enrich Greece's cultural life, and at the same time give participants the opportunity to experience the	Ιατρικά συνέδρια, αρχιτεκτονικά, φυσικών και ανθρωπιστικών επιστημών, πλουτίζουν την πολιτιστική ζωή της

Example of Comparable Data

English

Telecommunication occurs when the exchange of information between two or more entities (communication) includes the use of technology.

Communication technology uses channels to transmit information (as electrical signals), either over a physical medium (such as signal cables), or in the form of electromagnetic waves.

The word is often used in its plural form, telecommunications, because it involves many different technologies.

Greek

Με τον γενικό όρο τηλεπικοινωνίες, (telecommunications), χαρακτηρίζεται η κάθε μορφής ενσύρματη ή ασύρματη, ηλεκτρομαγνητική, ηλεκτρική, κ.λπ., ακουστική και οπτική επικοινωνία που πραγματοποιείται ανεξαρτήτως απόστασης.

Στους σύγχρονους καιρούς, αυτή η διαδικασία σχεδόν πάντα περιλαμβάνει την αποστολή ηλεκτρομαγνητικών κυμάτων ή ηλεκτρικών σημάτων από κατάλληλες ηλεκτρονικές συσκευές, όπως το τηλέφωνο ή ο ασύρματος, αλλά παλαιότερα περιελάμβανε τη χρήση ακουστικών σημάτων, όπως τυμπάνων, ή οπτικών, όπως ο σηματοφόρος καπνός ή η λάμψη της φωτιάς.

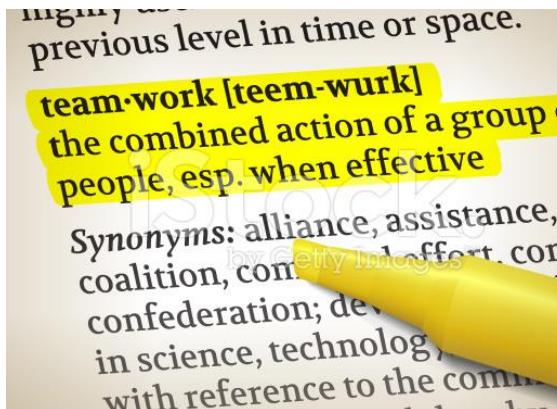

Spanish

Una telecomunicación es toda transmisión y recepción de señales de cualquier naturaleza, típicamente electromagnéticas, que contengan signos, sonidos, imágenes o, en definitiva, cualquier tipo de información que se desee comunicar a cierta distancia.

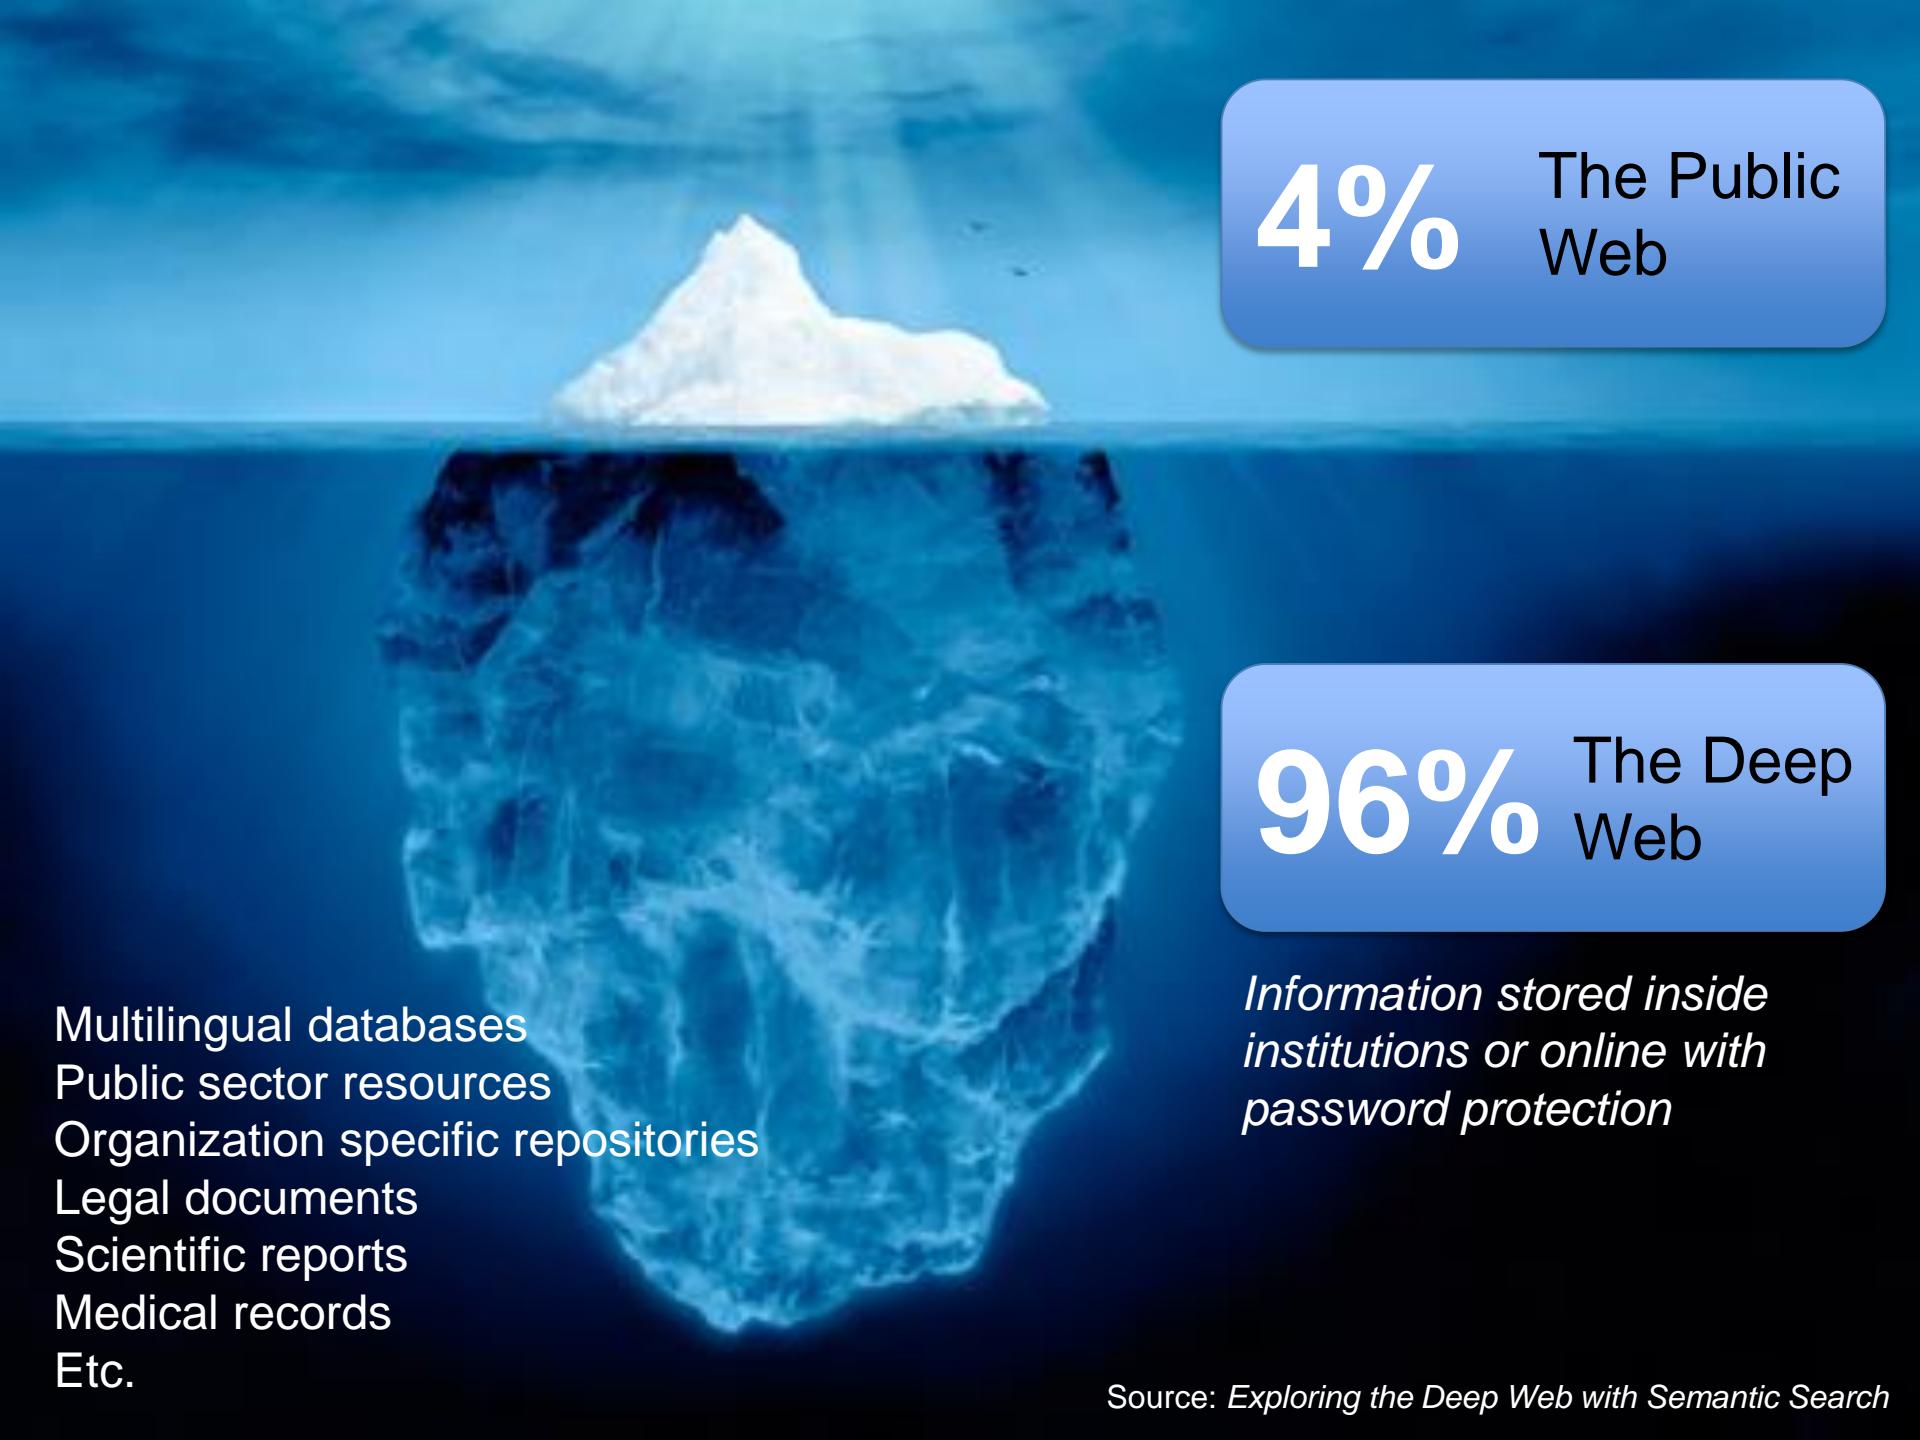

Por metonimia, también se denomina telecomunicación (o telecomunicaciones, indistintamente) a la disciplina que estudia, diseña, desarrolla y explota aquellos sistemas que permiten dichas comunicaciones; de forma análoga, la ingeniería de telecomunicaciones resuelve los problemas técnicos asociados a esta disciplina.

A computer is a general purpose device that can be programmed to carry out a set of arithmetic or logical operations automatically. Since a sequence of operations can be readily changed, the computer can solve more than one kind of problem. Conventionally, a computer consists of at least one processing element, typically a central processing unit (CPU), and some form of memory. The processing element carries out arithmetic and logic operations, and a sequencing and control unit can change the order of operations in response to stored information. Peripheral devices allow information to be retrieved from an external source, and the result of operations saved and retrieved.

Since a sequence of operations can be readily changed, the **computer** can solve more than one kind of problem. Conventionally, a **computer** consists of at least one processing **element**, typically a **central processing unit (CPU)**, and some **form** of memory. The processing **element** carries out arithmetic and logic operations, and a sequencing and **control** unit can change the order of operations in response to stored **information**. **Peripheral** devices **allow** **information** to be retrieved from an external **source**, and the result of operations saved and retrieved.

**European Language
Resource Coordination**
Connecting Europe Facility

Takk fyrir!

Looking forward to a fruitful
cooperation to make Icelandic
machine translation better!

European Language Resource Coordination (ELRC) is a tender operating under the EU's
Connecting Europe Facility SMART 2014/1074 programme.
