

# ELRC – Potential Data Holders and Invitation Strategy for ELRC Conference

Josef van Genabith Andrea Lösch

### General frame | 1

- Identification of potential data holders (at least 6 in each country) for two reasons:
  - To collect multi-lingual language resources
  - To invite them to the 2<sup>nd</sup> ELRC Conference
- 2<sup>nd</sup> ELRC Conference (Brussels, 26.10.2016)
  - Central goal: To stimulate data donation by public service administrations in the CEF affiliated countries
  - Target audience (120 participants):
    - potential holders and/or users of language resources
    - · responsibles for translation services
    - representatives of information offices and/or public relation offices
    - · responsibles for data and data management
  - Invitation-based event
  - Each country should be represented by more than one potential data holder (on average 4 participants per country)

### **General frame I 2**

- Focus and contents of the 2<sup>nd</sup> ELRC Conference:
  - Objective 1: Demonstrate the benefits and possibilities of machine translation for public service administrations and raise awareness on the importance of corresponding data and language resources
    - Hand-on accounts from experts (including both translators in the public service administration as well as LSPs) on their day-to-day practice of how MT is being used and with which benefits.
    - Direct illustration of the role of data for the quality of MT, showing what can be achieved with the right data.
  - Objective 2: Illustrate what kind of data is needed and how public service administrations can provide such data
    - Best practice examples and practical experiences of data donation from prominent national ministries and public service administrations.
    - Overview of the status of data collection in all countries.
    - Questions (and answers) linked to the provision of data.

### General frame I 4

- Focus and contents of the 2<sup>nd</sup> ELRC Conference (cont.):
  - Give and insight into the services of the CEF Digital Service Infrastructure (DSI) that should in the future be available to public service administrations in a multi-lingual manner
    - Short overview of the general requirements by public sector administrations from the current requirements study
    - Overview of existing DSIs.
    - Practical illustration of prominent DSIs to the audience.

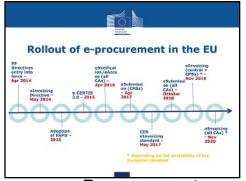

# DSIs and potential data holders I 1

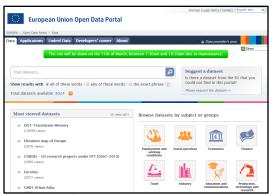

Europeana

**eProcurement** 

**Open Data Portal** 

**EESSI** 

**eJustice** 

**Online Dispute Resolution** 

## DSIs and potential data holders I 2

- National stakeholders / potential LR holders of DSI's
  - Europeana: Institutions listed at <u>http://www.europeana.eu/portal/browse/sources.html</u>
  - ODR: Dispute Resolution bodies listed at https://webgate.ec.europa.eu/odr/main/?event=main.adr.sh ow
  - EESSI: Institutions by country listed at <a href="http://ec.europa.eu/social/main.jsp?catId=1028&langId=en">http://ec.europa.eu/social/main.jsp?catId=1028&langId=en</a>
  - <u>eJustice</u> (response from the DSI owner who cooperates with these entities in the context of the ECLI search engine):
    - Court of Justice
    - the European Patent Office
    - ACA Europe (<a href="http://www.aca-europe.eu/index.php/en/">http://www.aca-europe.eu/index.php/en/</a>)

# **Summary potential data holders I 3**

### General data holders:

- any public service administrations and public bodies that may hold multilingual data, i.e. data relevant at least to the general (administrative/regulatory) domain
- where possible make use of existing networks or relevant working groups in your country
- DSI specific data holders:
  - National stakeholders of Europeana, ODR, EESSI, eProcurement, eHealth, Open Data Portal
  - other organisations holding multi-lingual data relevant to this domain

# Your help is very much appreciated!!!!
