# Language Data Matters?

# WHAT IS ELRC ALL ABOUT?

---

## A TRUE DIGITAL SINGLE MARKET...

„I think that the overall vision is the true Digital Single Market where all EU citizens can access information relevant and of interest to them, no matter what language(s) they speak. Language should not be a barrier, but is currently one of the most substantial challenges to have a truly integrated European Union. These barriers affect all areas of EU lives – whether it is cross-border services or trade and impacts all levels of society. By providing automated translation we are addressing these challenges, and ELRC’s task of collecting data and establishing pipelines is a concrete action specifically addressing the language barriers.“

Susan Fraser, Project Officer, EC

**Vision:** True Digital Single Market

**Mission:** Create sustainable data pipelines

**Purpose:** Identify and collect language resources

- WHAT DATA ARE WE LOOKING FOR?
- Non-personal public sector information
  - “Public Sector Information is information generated, created, collected, processed, preserved, maintained, disseminated, or funded by or for the Government or public institution”  
(European Data Portal: Analytical Report 9: The Economic Benefits of Open Data, p.7.)

## SOME BENEFITS OF OPEN DATA

- Open language data supports the strong language technology research community in Europe
- Governments are one of the main re-users of Open Data themselves (Berners-Lee, Open Data Goldbook for Data Managers and Data Holders, cf. p.15.)
- Allows individuals and businesses to access and engage in cross-border digital public services and trade

# COUNTRY PROFILES

**The reason**

The process

The goal

## REASON

- Digital landscape varies a lot in the different countries
- Very difficult to identify decision makers that can authorize data sharing
- There is no “one size fits all” solution for data pipelines and data collection

# COUNTRY PROFILES

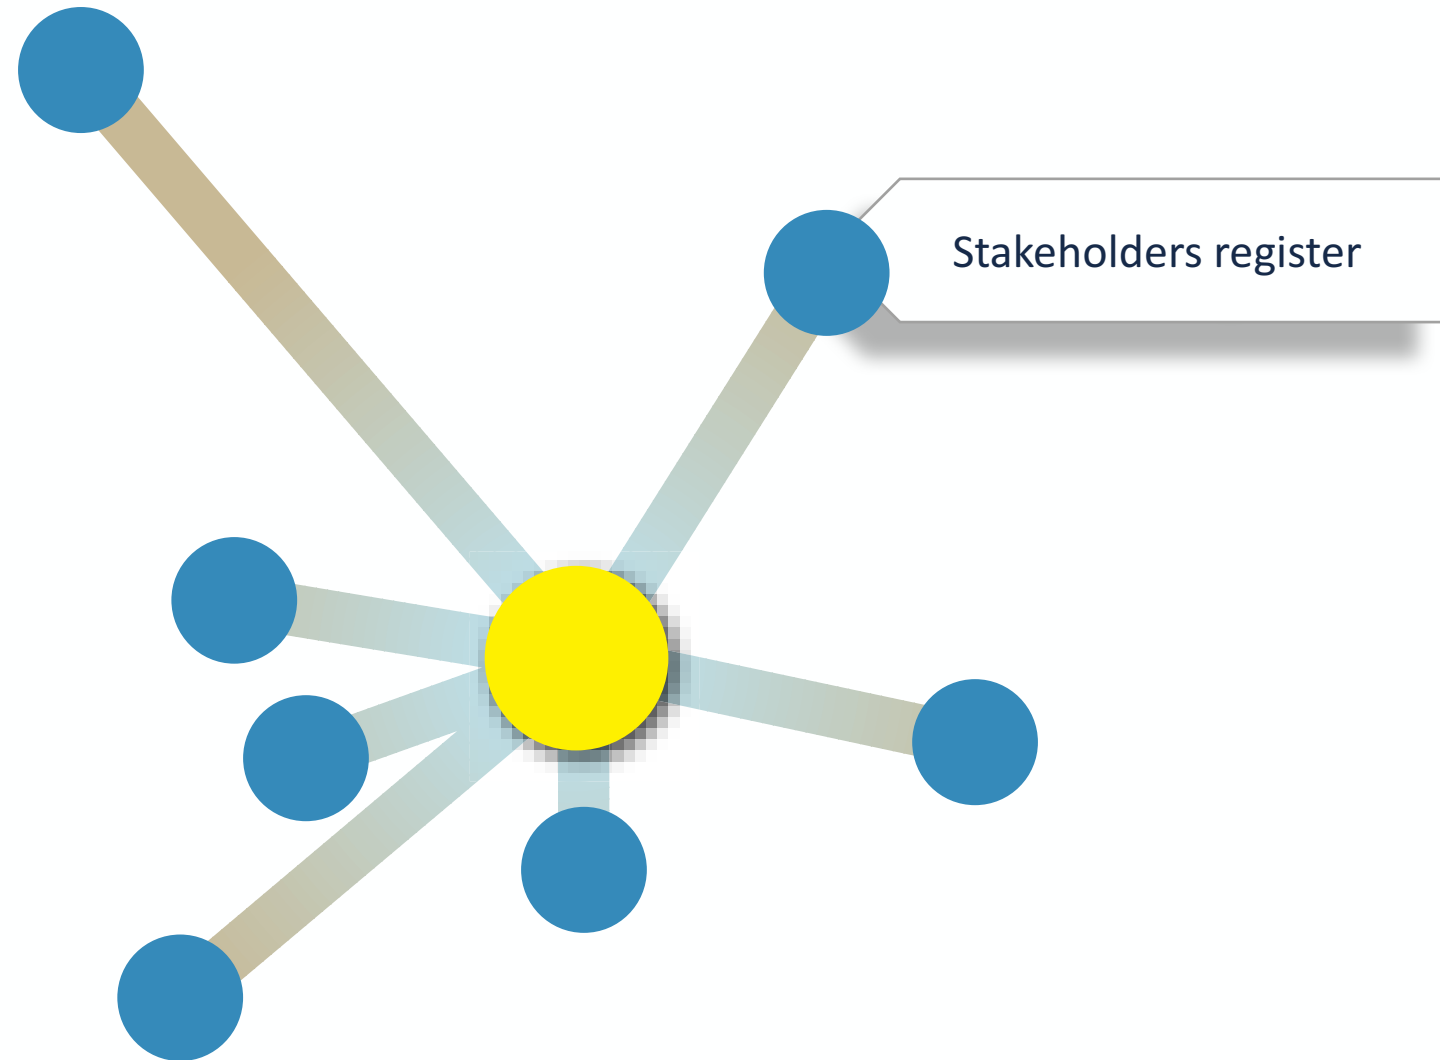

---

The reason

**The process**

The goal

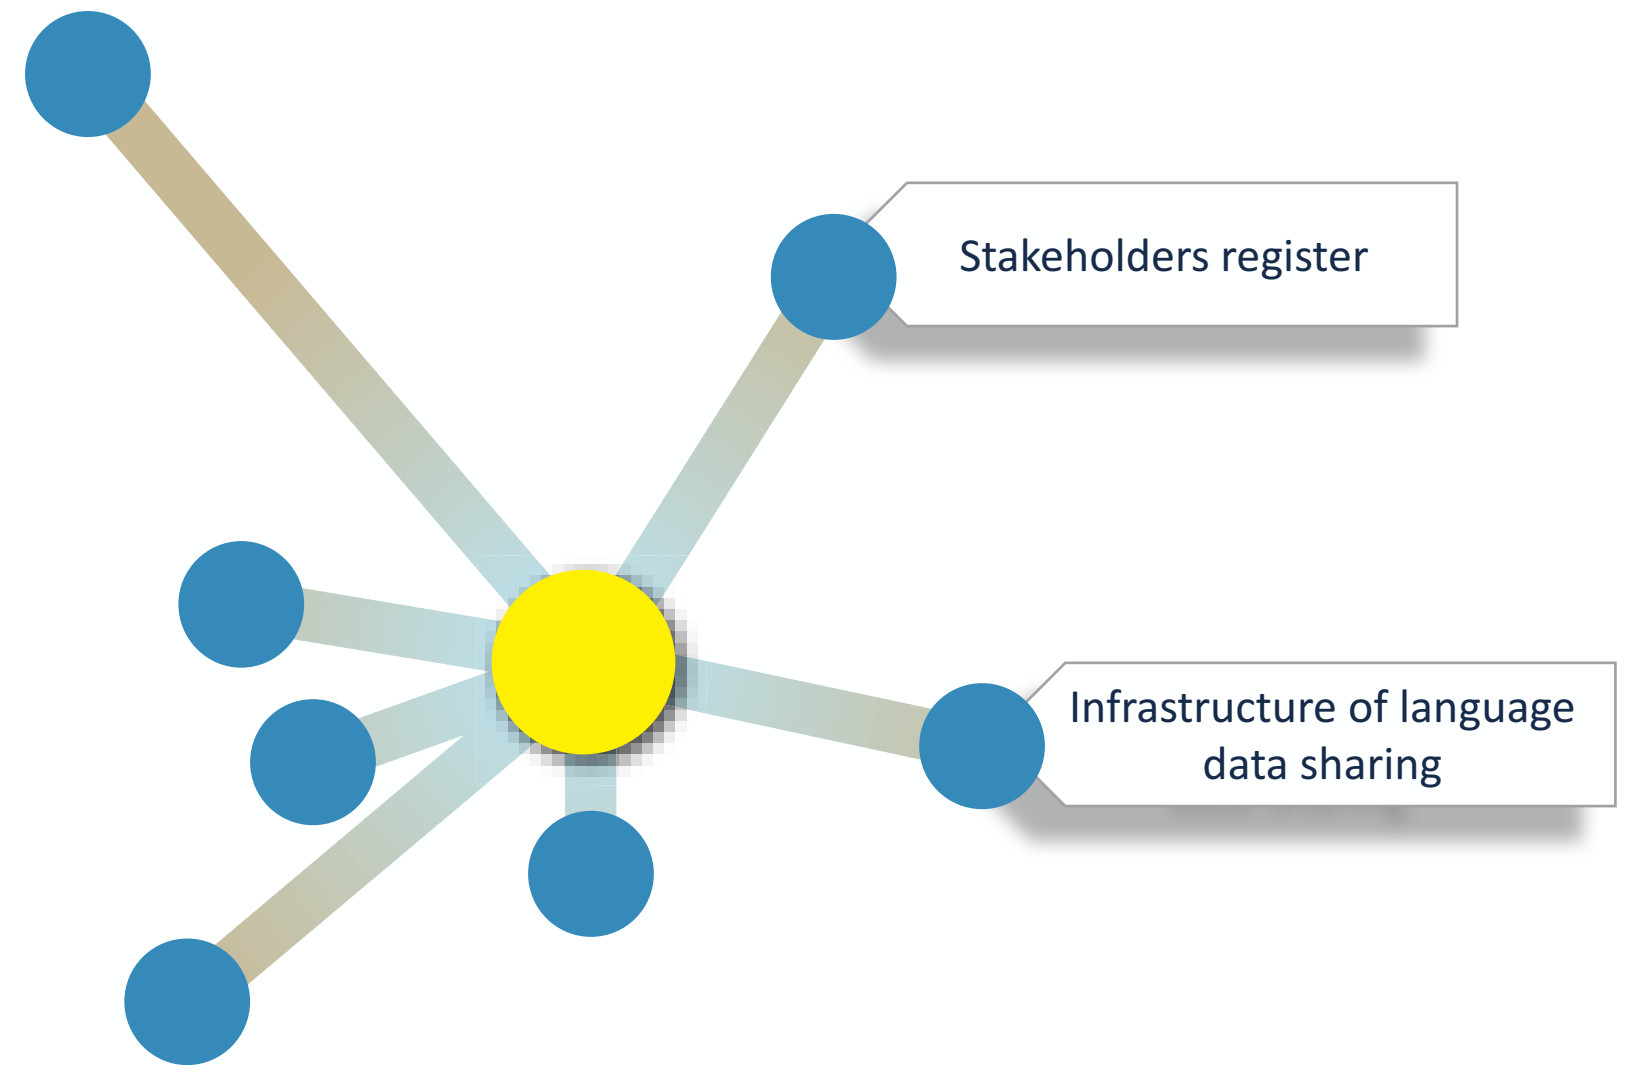

# COUNTRY PROFILES

## STAKEHOLDERS REGISTER

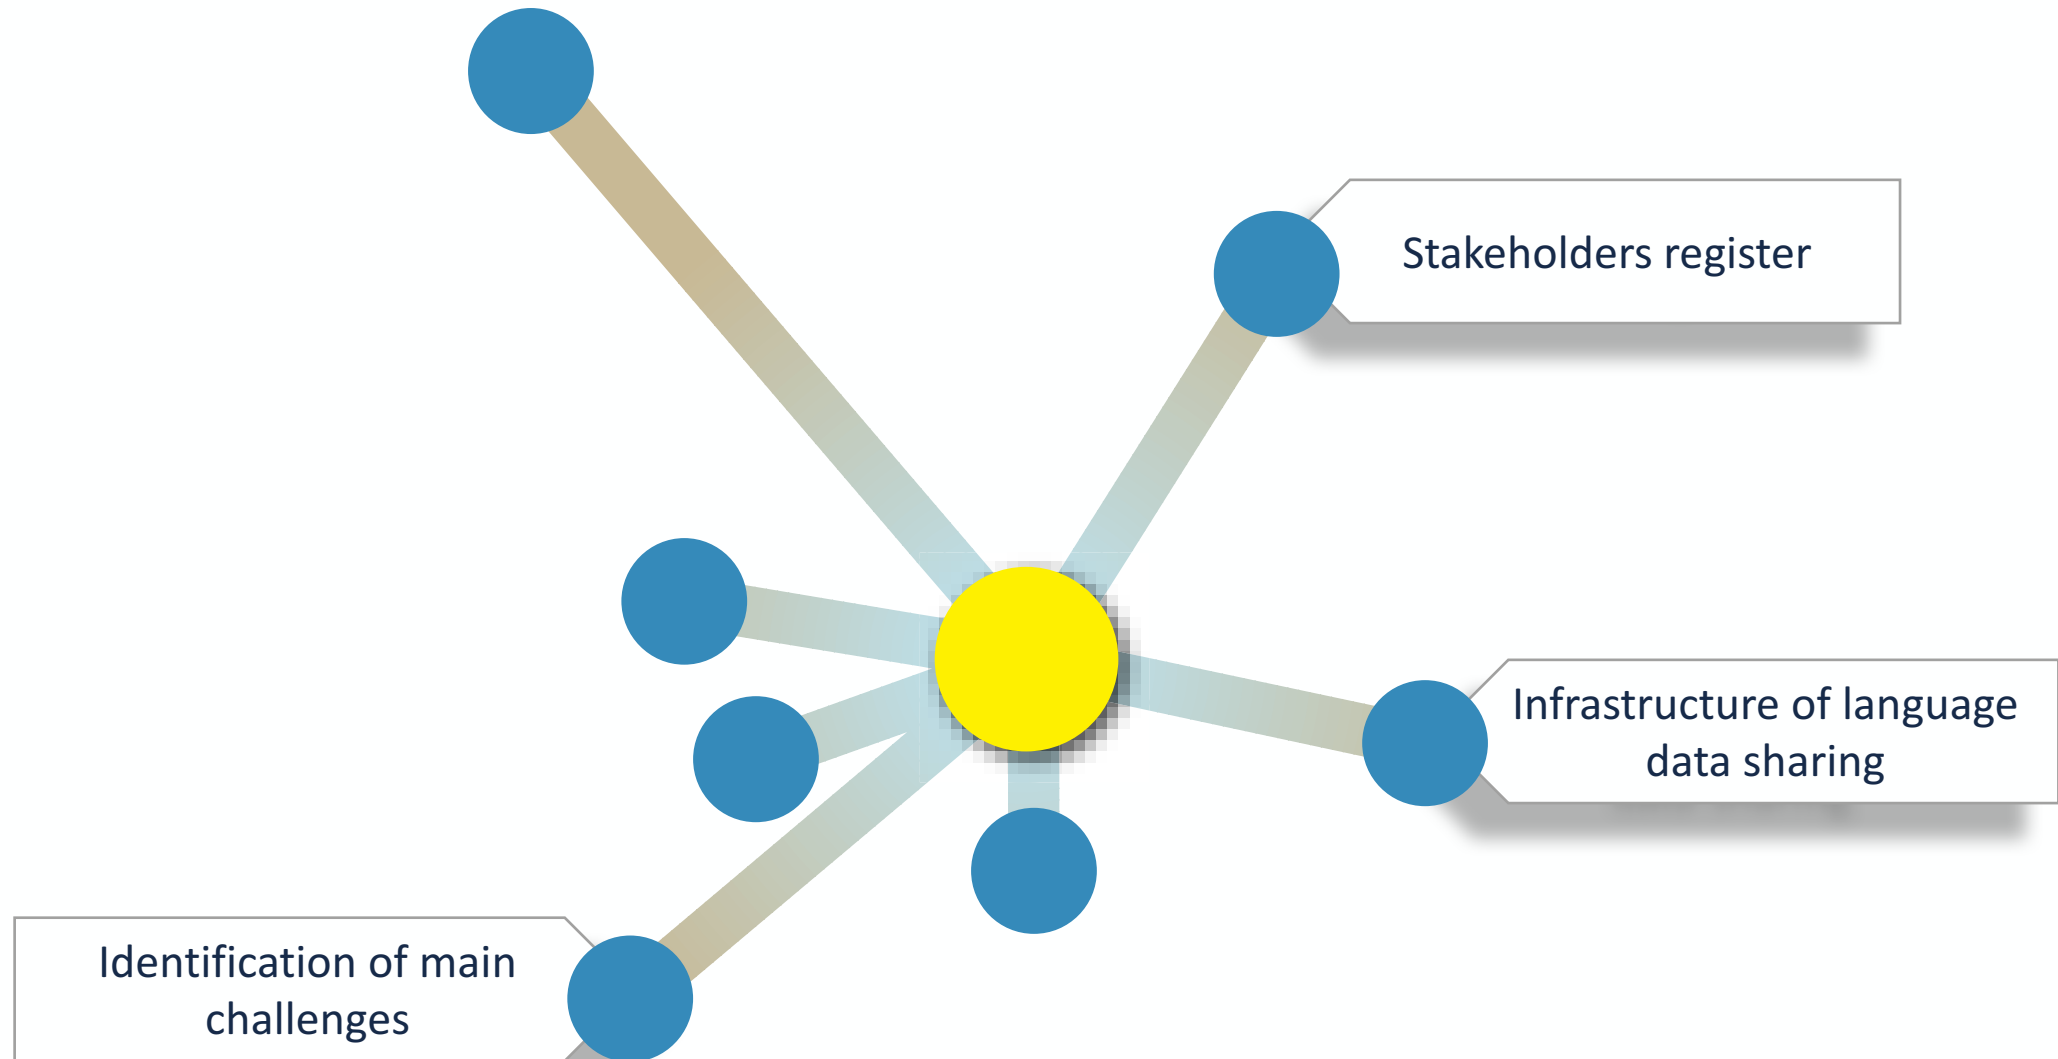

- List of stakeholders including information such as
  - Stakeholder group (e.g. language data creator or holder?)
  - Outsourcing of translations?
  - Stakeholder category (e.g. public body or public online service, research institution, LSP etc.)
  - Stakeholder's position (who are the key players and decision makers?)
  - etc.

## INFRASTRUCTURE OF DATA SHARING

- How are translation needs in the public sector met?
- Who outsources translations and who translates in-house?
- Are these services centralized?
- Do language service providers share their TMs?

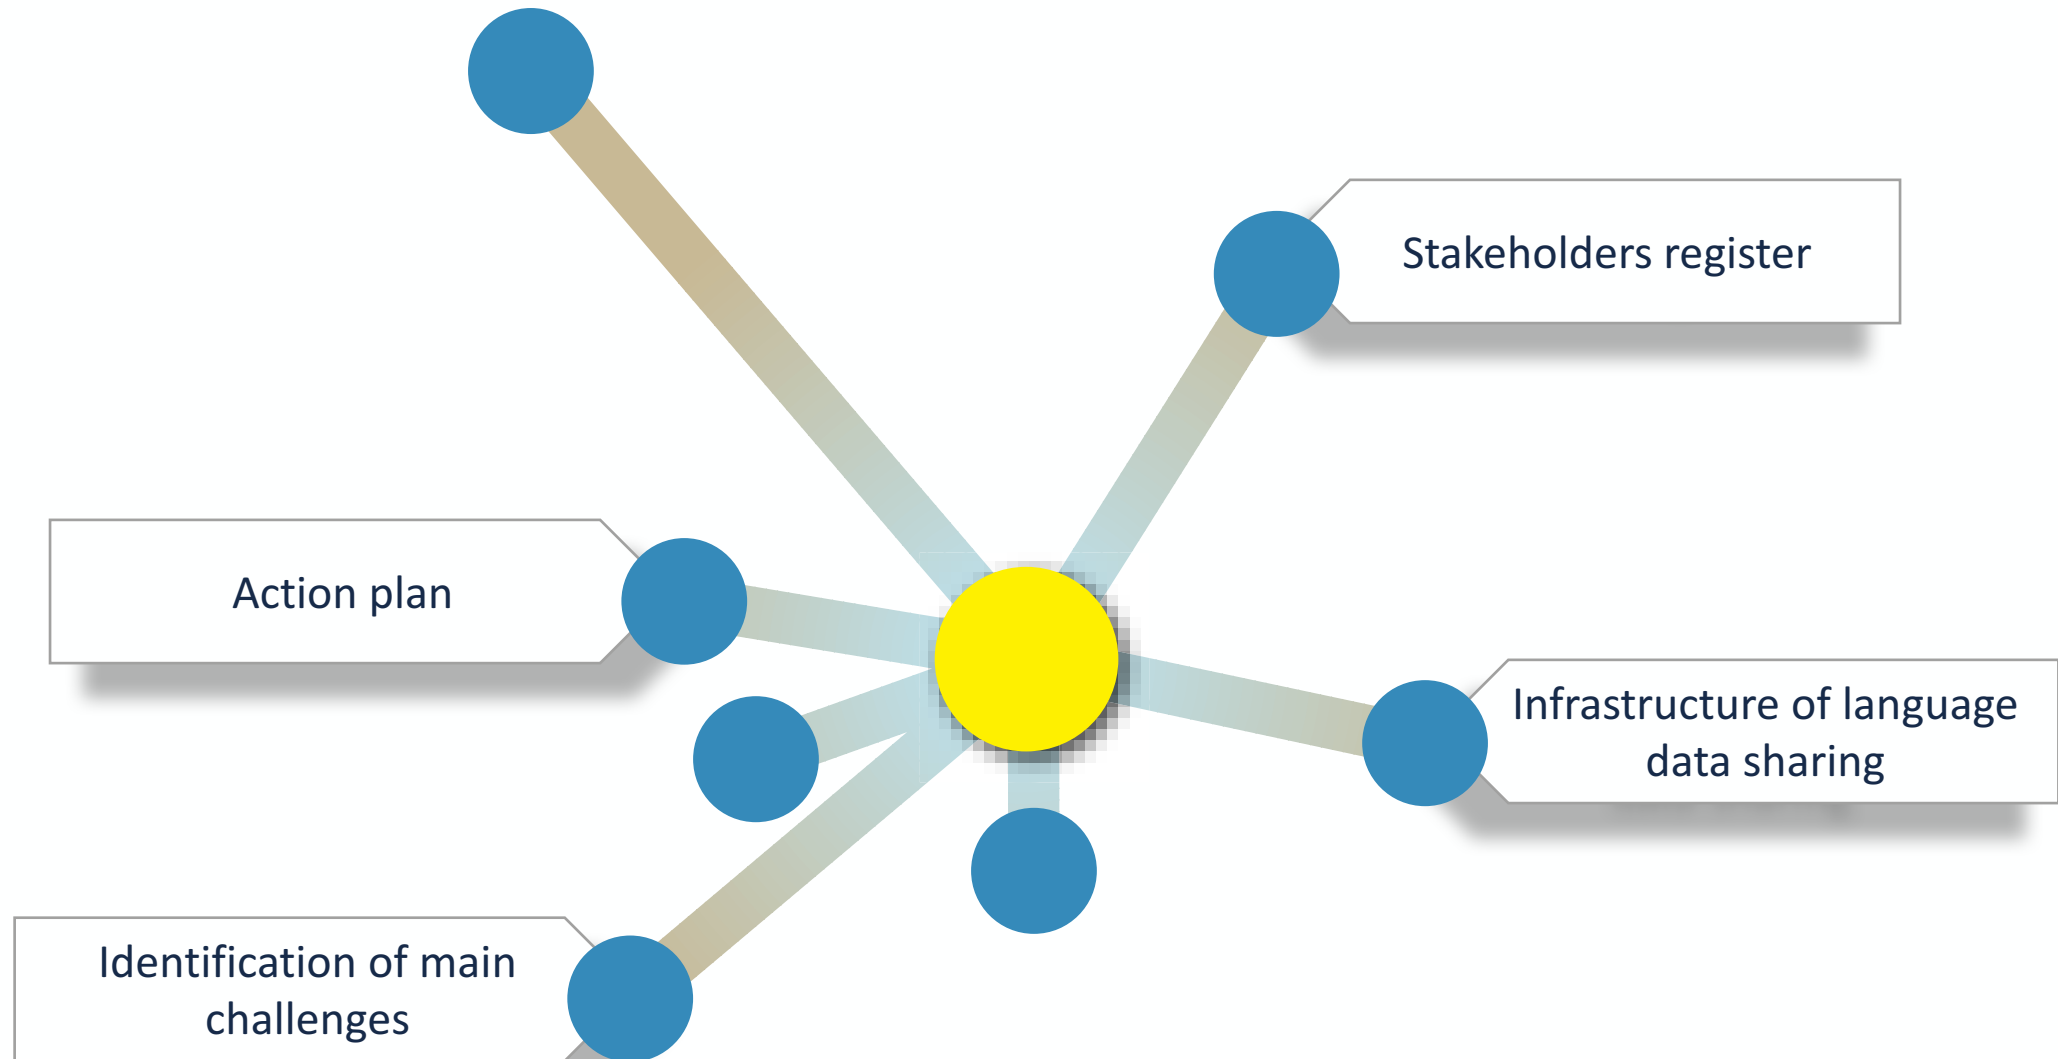

# COUNTRY PROFILES

## IDENTIFICATION OF MAIN CHALLENGES

- Language data is not considered valuable
- Little or no coordination of information/data exchange between public services
- Legal concerns (especially personal data)
- TMs are not requested back
- No person in charge of (language) data management

# COUNTRY PROFILES

## ACTION PLANS

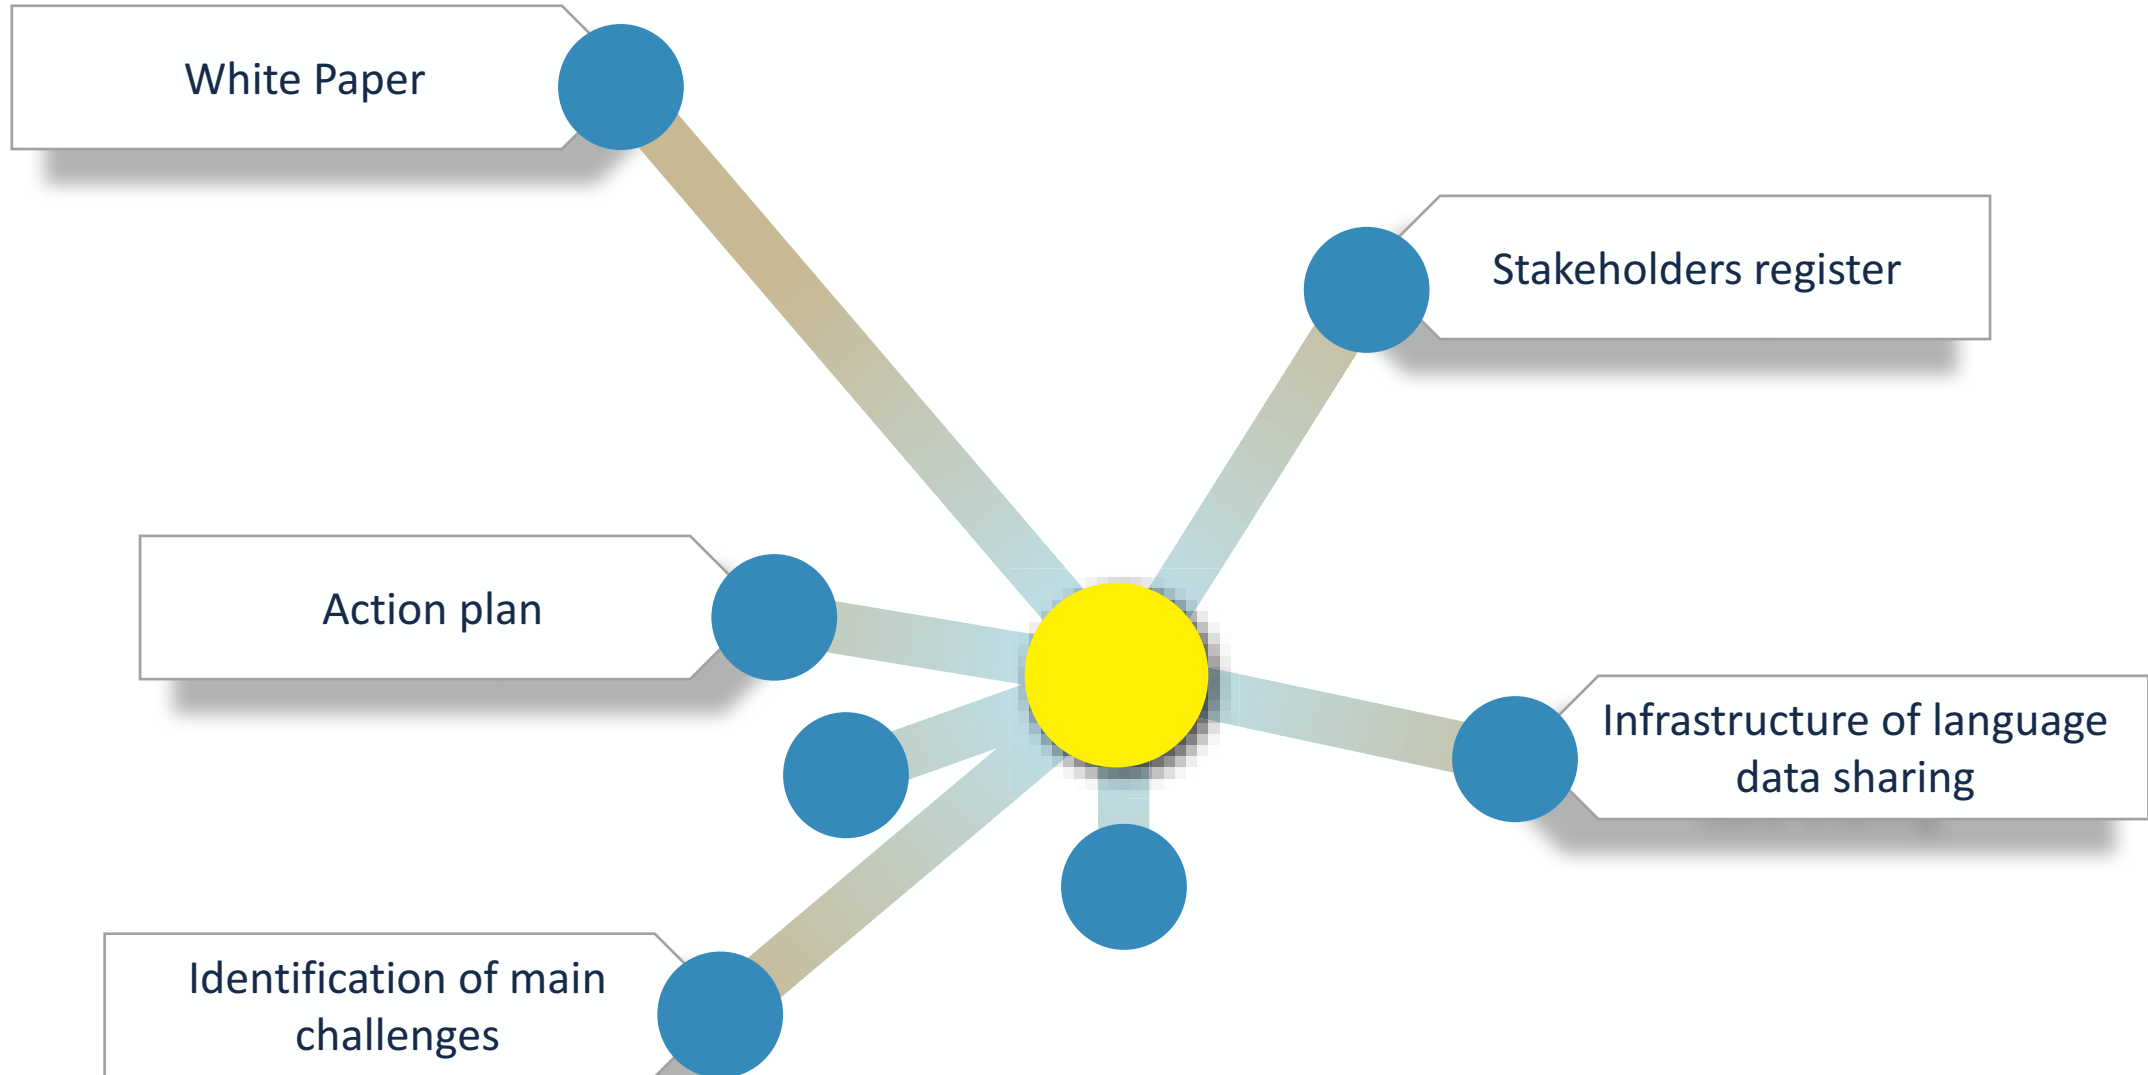

- Objective 1: Raising awareness of language data as open data and a valuable asset
- Objective 2: Increasing interest in MT/LT in public services as part of the national digital policy
- Objective 3: Tackle legal/ethical issues and concerns
- Objective 4: Identify and gain access to outsourced translations
- Objective 5: Establish good data management practices in public services

## ACTION PLANS

- The ELRC consortium answered as many questions as possible and published the responses on the ELRC website: [http://helpdesk.lrc-coordination.eu/cef\\_dashboard/](http://helpdesk.lrc-coordination.eu/cef_dashboard/)
- Discussion of three main challenges in working groups

# COUNTRY PROFILES

## WHITE PAPER

- Publication of results stressing the importance and value of language data
- All National Anchor Points as co-authors
- To be presented at ELRC Conference in Helsinki in November
- Laying the groundwork for further collaboration and application for CEF funded projects
