Introduction

On behalf of the ministry of Internal Affairs and Kingdom Relationships I am, as the intended National Anchor Point Public Services, present at this 8th Language Resource Board.

My assignment is clear:

- Promote the use of the eTranslation building block at ministries and at organizations with public roles.

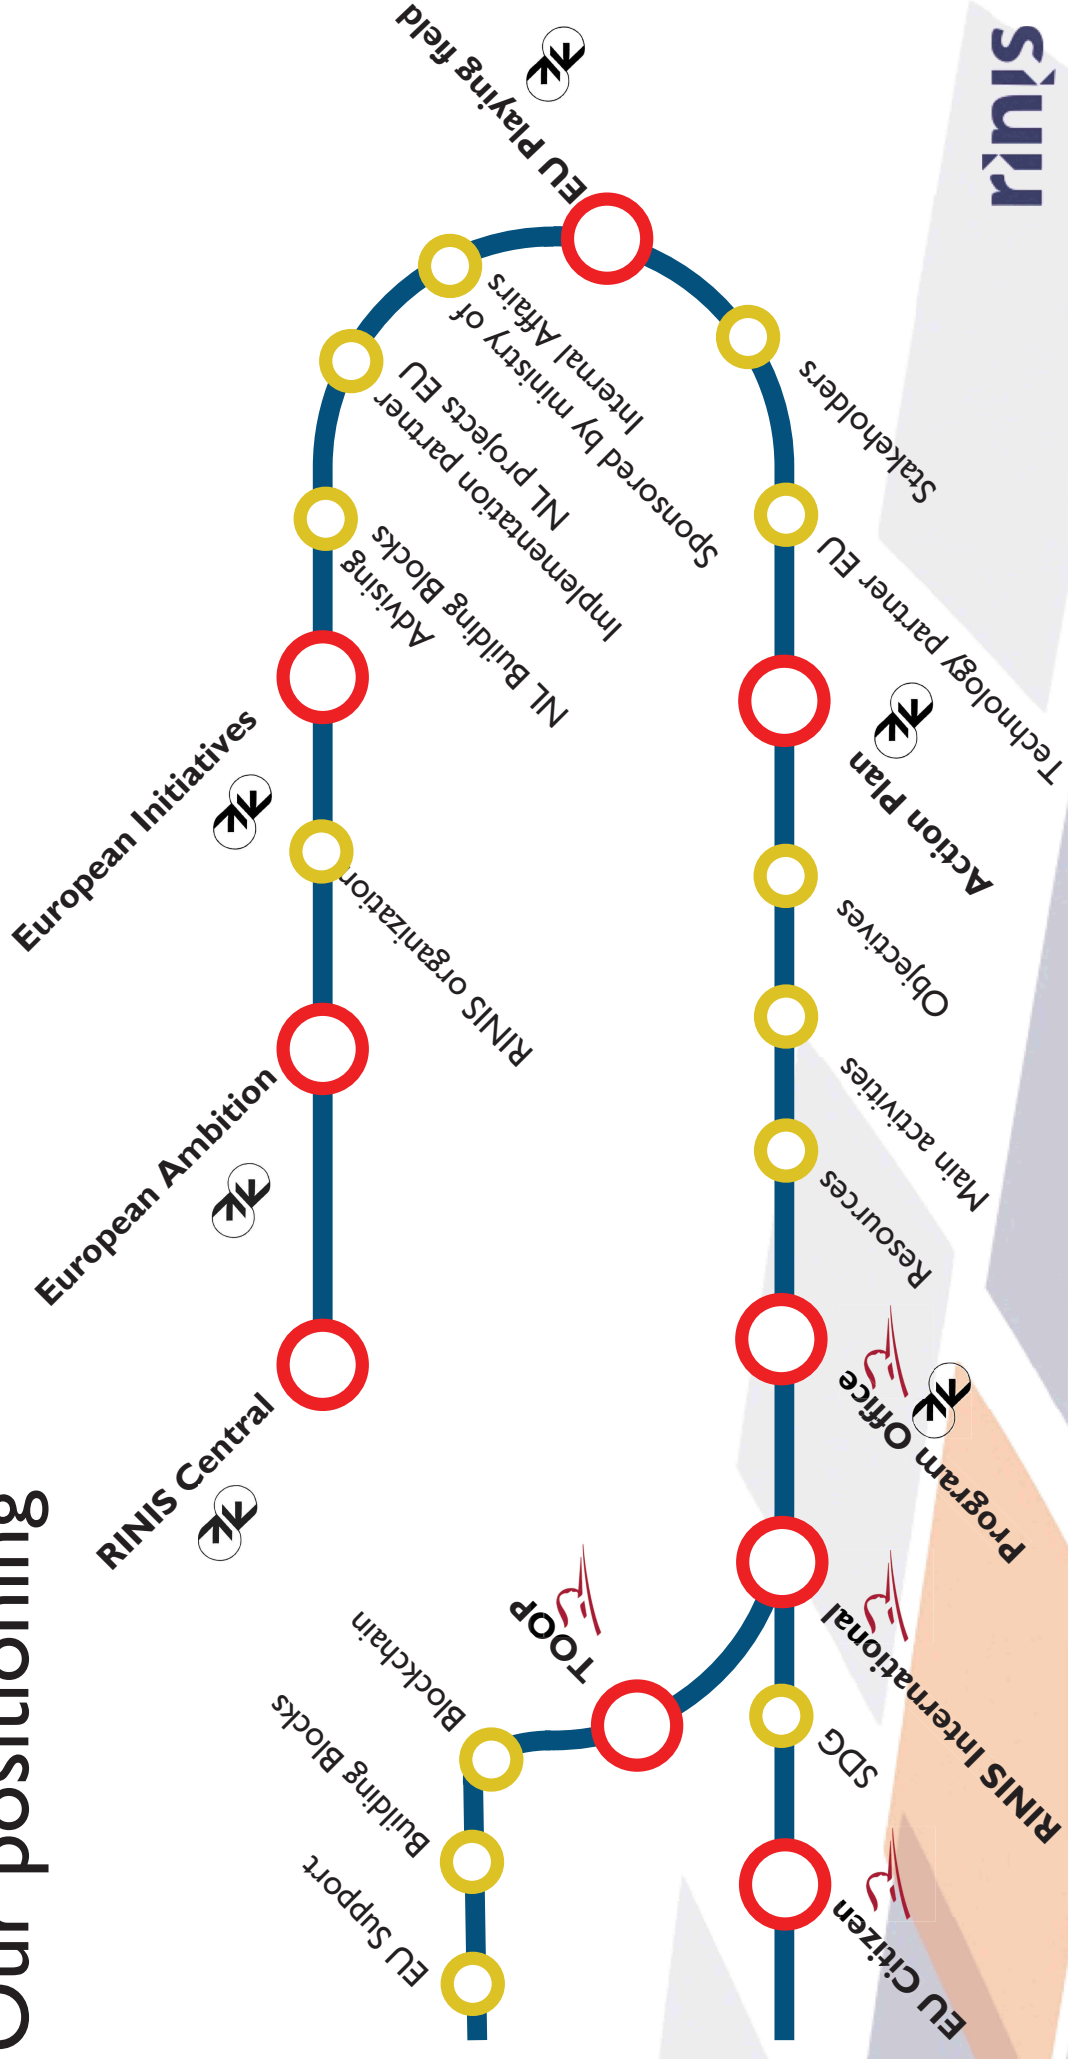

Today and tomorrow my goal is to listen, observe and become familiar with this Automated Translation playing field.

Ambitions

Supported by the Dutch ministry of Internal Affairs and Kingdom Relationships, the RINIS foundation has started an ambitious program in order to increase our European visibility as well as to promote the DSI in the Netherlands. With this program we have three main ambitions:

1. Become the implementing partner in large scaled Dutch governmental programs for European building blocks and services.
2. Become the knowledge partner of the EU for the development and integration of the Digital Service Infrastructure.
3. Become the solution partner for both national as international public organizations for eDelivery, eTranslation, eHealth, Blockchain and TESTA.

Our positioning

Connecting Europe

Objective

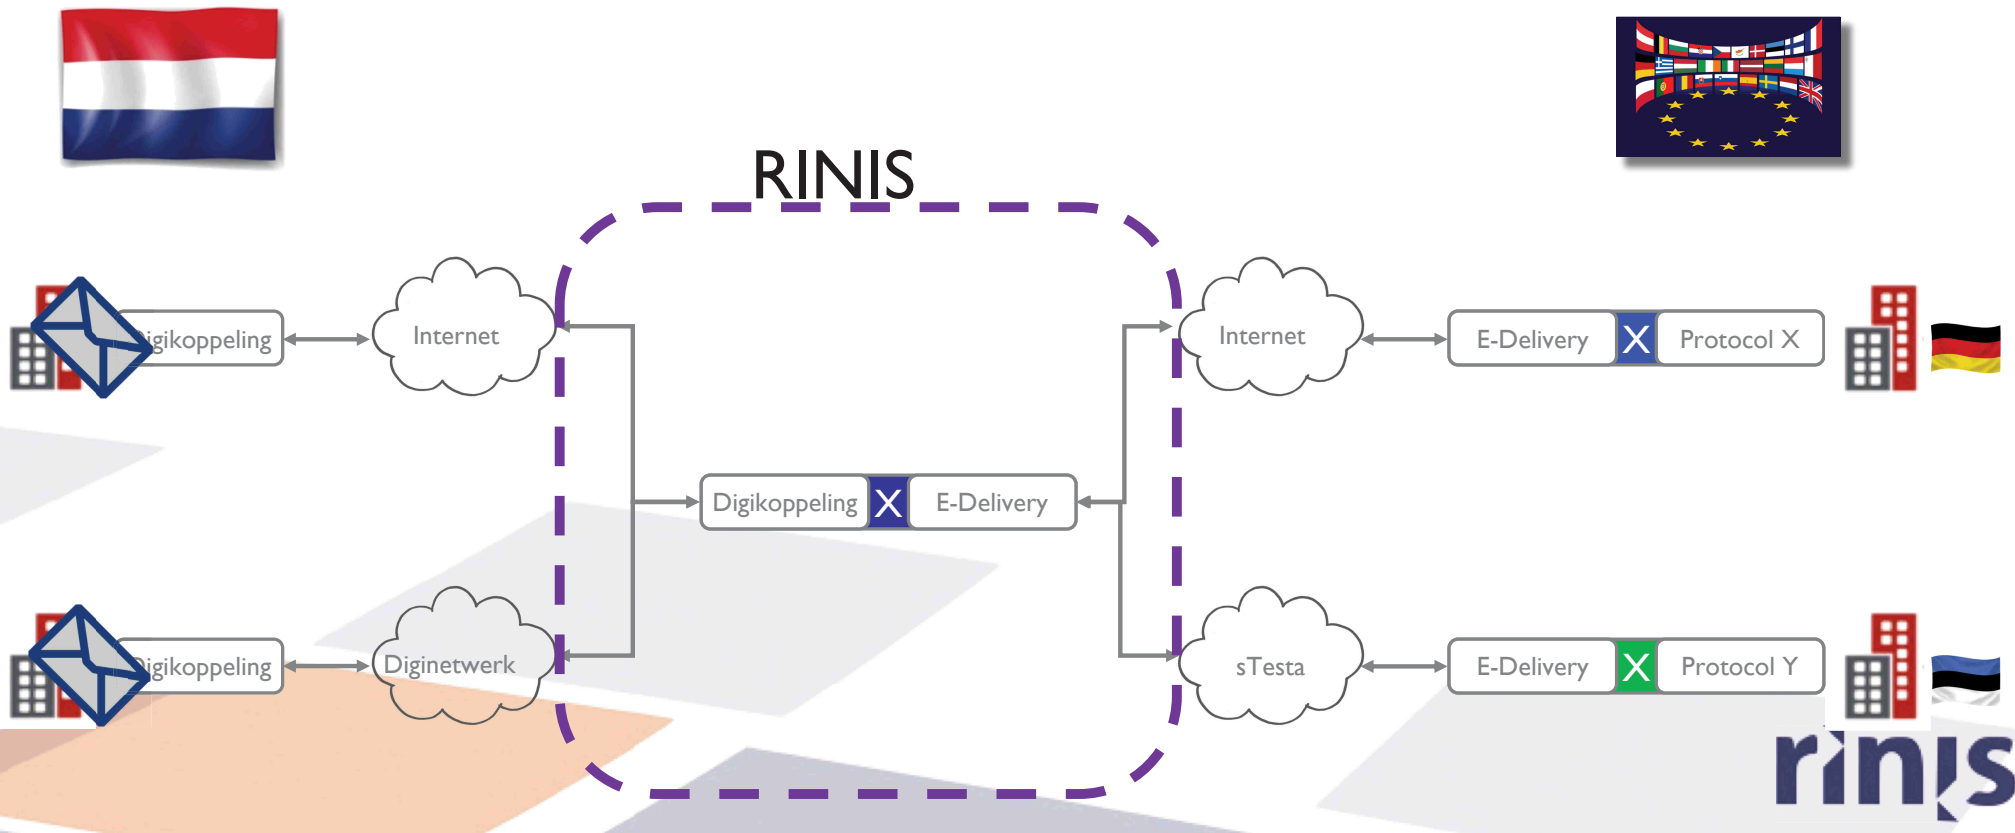

Given the main goal of eTranslation (help European and national public administrations exchange information across language barriers in the EU) and given the position of RINIS in the Netherlands as implementing, knowledge and solution partner, our main objective is:

- **Make the eTranslation service available for our national DSI partners.**

We will do this as we made the eDelivery building block available.

National Implementing Partner

An example of the RINIS connector between national and international standards:
