

# ELRC Network

## Country-specific workshops

### Concept and Contents

Stelios Piperidis (ILSP)  
Maria Giagkou (ILSP)

- Raising awareness (about existing and emerging multilingualism enabling solutions)
- Eliciting requirements (for multilingual solutions)
- Collecting data (using which multilingual solutions will be built or improved)
- Charting the national scene (in terms of players/data/tools)
- Creating/reinforcing synergies (between national and European actions)

- Organise 30 country-specific workshops, in order to
  - identify online services (national and European) which could benefit from CEF AT
  - identify the multilingual requirements of these services
  - identify relevant language resources and LT tools
- Workshops character:
  - identify and examine public online services relevant for CEF and potentially benefitting from CEF Automated Translation
  - work more hands-on with interested parties

- sustain and expand the network established in ELRC
- re-relate the European context to local needs and local potential, by showcasing existing country-specific services benefiting from eTranslation
- monitor the developments in data and tools availability both at each particular country and at the European level (ELRC as an observatory)
- update the already engaged stakeholders on the results achieved by CEF and ELRC
- support interested parties in managing their data, from identifying data to resolving technical and legal issues – several aspects of data management (plans)

ELRC workshops	ELRC+ workshops
Mainly targeted potential data owners	Will target both data owners and <b>online services stakeholders</b> : <ul style="list-style-type: none"> <li>a) Local services that implement/adopt DSIs and Building Blocks</li> <li>b) National public online services</li> <li>c) Services that have been developed by (EU) projects</li> </ul>
Finding: Public administrations across Europe lack the resources to support ELRC activities	Top-down approach (i.e. reach out to <b>high-level officials</b> ) interleaved with a bottom-up approach
MT as a translator's aid (focus on MT@EC)	More emphasis on MT as the indispensable solution to providing multilingual online services (focus on eTranslation platform)
"share whatever the type and format of available resources"	Raise awareness on <b>domain-specific</b> data, i.e. data appropriate to accommodate the requirements of DSIs
Introduction to the legal framework, "providing public open data is safe"	<b>Data-oriented approach</b> with concrete examples, simple workflows and techniques – as interactive as possible

## ELRC workshops

### Training sessions:

- MT@EC presentation
- ELRC-SHARE not available at all WSs
- basic notions and types of datasets

## ELRC+ workshops

### Training sessions:

- MT@EC live demo to exhibit the power of appropriate training data (adapted vs. non-adapted scenario)
- Familiarize participants with the repository
- Bird's eye view of the process from translated documents to translation memory files

- CEF is about online services that will benefit public administrations, the industry and every single citizen in Europe
- eTranslation is a cross-sector service enhancing various DSIs and empowering national online services
- ELRC seeks to enhance eTranslation, thus empowering both European and national public online services
- CEF and ELRC exhibit tangible results
- The “helping-countries-help-themselves” perspective: support your language through national funding schemes and policies for sustainable (open) data, digital services, multilingualism and language technologies to ensure the country’s presence in a digitally connected Europe. Let’s align EU and national activities in support of the modernization of the public sector

- **Policy-level and strategy oriented component:** raise awareness of CEF initiatives and link them to the local context, in order to unlock support by national decision makers at the highest level possible
- **Users and “practitioners” component:** tutorial-like interactive character, sets the grounds for facilitating actual engagement through sharing language data (and possibly tools)

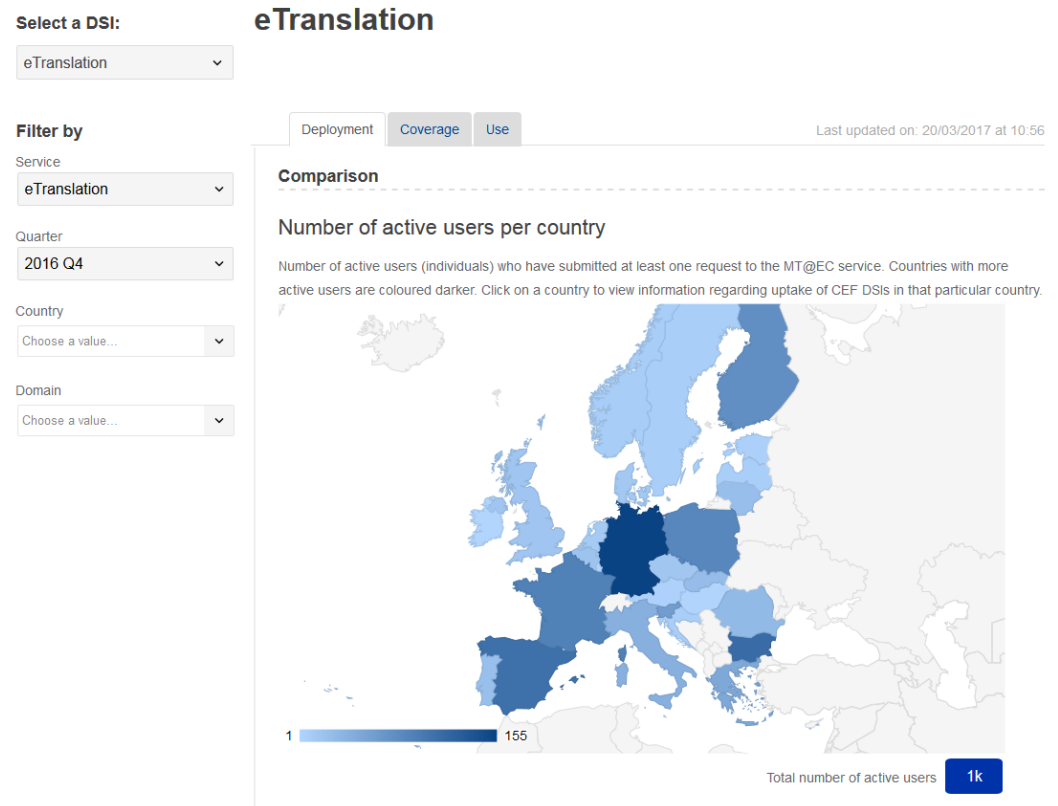

# Master Agenda

Per type	Per domain
<p><b>High-level officials</b> who can influence decision-making</p>	<p>eGovernment, Open Government, Multilingualism and Language Technologies</p>
<p><b>Digital services stakeholders</b>, funded/created by</p> <ul style="list-style-type: none"> <li>• CEF</li> <li>• National public initiatives</li> <li>• Other (EU) projects</li> </ul>	
<p><b>Potential data owners</b></p> <ul style="list-style-type: none"> <li>• Engaged participants and/or contributors from previous series of WSs</li> <li>• Public sector (central government and regional/municipal authorities): target departments dealing with multilingual content</li> <li>• international NGOs with local representation, esp. those active in immigrants/refugees</li> <li>• Consulates and embassies</li> <li>• Bilateral Chambers of Commerce</li> <li>• ...</li> </ul>	<p>Preferably relevant to DSIs: eJustice, Business registers, Safer internet, Social Security, Open Data, Dispute Resolution</p>

# National scene(s)

- CEF eTranslation uptake
- National stakeholders
- Sources to identify participants

- **Uptake of CEF eTranslation Building Block**  
-> per country view of deployment and use  
(<https://ec.europa.eu/cefdigital/wiki/display/CEFDIGITAL/Uptake>)

- Uptake of CEF eTranslation Building Block

-> per country view of deployment and use

Number of transactions

This chart shows how many transactions have taken place per DSI, in the selected country.

Trends

Evolution of the number of transactions

This chart shows the evolution of the number of transactions that have taken place per DSI, in the selected country.

- **(Re)Use of eTranslation by other non-CEF projects**  
 -> some of the projects may have national coordinators or contact points  
 (<https://ec.europa.eu/cefdigital/wiki/display/CEFDIGITAL/Reuse+by+other+projects>)

## Reuse overview

16% of the Policy Systems projects and 67% of the Corporate Systems projects are reusing or committed to reuse at least one Building Block. The pie chart below shows how many systems are reusing 0 or more Building Blocks. For more information on how these figures are computed, click here.

## Reuse matrix

The table below shows the reuse of each building block by non-CEF Projects for each Project owner. Reuse is monitored following the reuse journey from commitment to analyse to implementation and reuse of the building block.

Select a DG:

Project\BB	eDelivery	eID	eInvoicing*	eSignature	eTranslation
EUGO	Commitment to analyse	No commitment	n/a	No commitment	No commitment
IMI	No commitment	No commitment	n/a	No commitment	Reuse
SOLVIT	No commitment	No commitment	n/a	No commitment	Reuse

■ Reuse  
 ■ Commitment to reuse  
 ■ Commitment to analyse  
 ■ No commitment  
 ■ Not going to reuse

\* The eInvoicing building block will only be ready for reuse once the European Norm for eInvoicing will be finalised.

## View per building block

This chart shows to which extent each of the building blocks is reused. The evolution over time of the reuse situation can be seen by moving the slider on the timeline under the chart.

Romania  
Slovakia  
Slovenia

- National Anchor Points as local representatives of ELRC and local organisers
  - In organizing the workshop you will be actively and intensely supported by the ELRC partner responsible for your region (ELDA, ILSP, Tilde)
- Your involvement is the **key success factor** for:
    - defining the local contexts and needs
    - underlining the national character/identity of the event

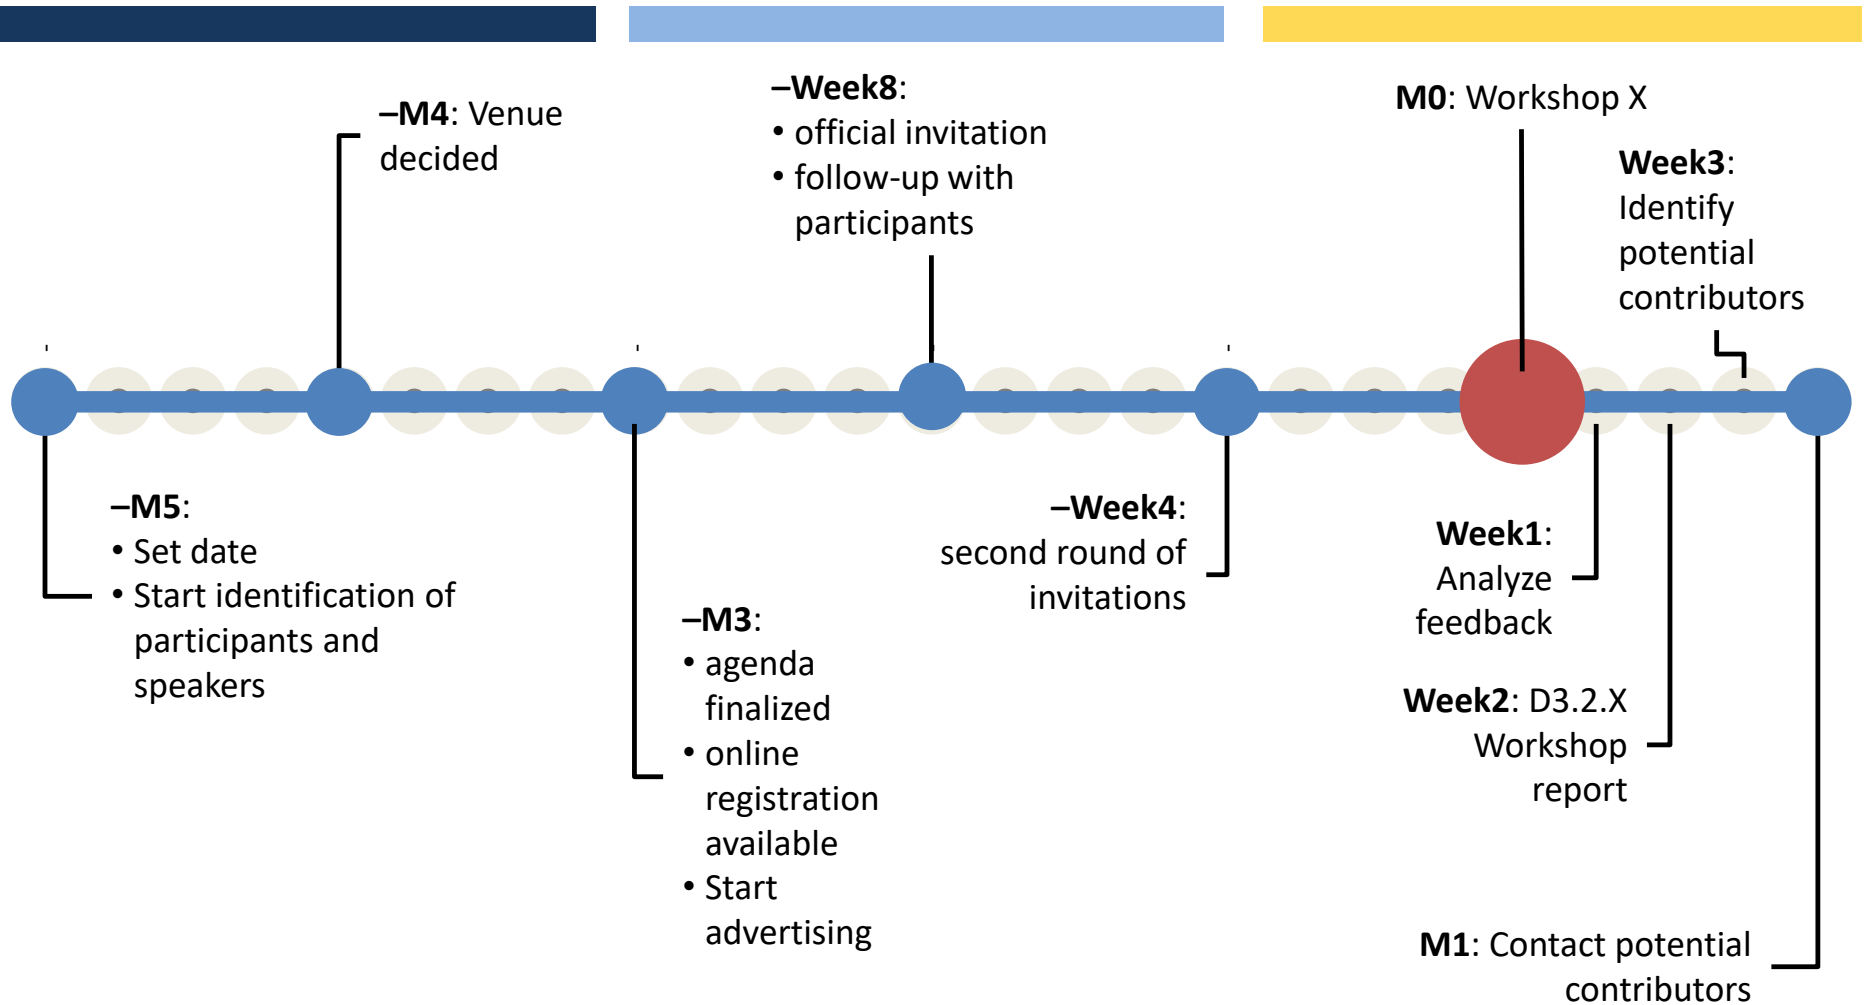

- Main tasks:
  - Localization of content (agenda, invitations, participants folder, dissemination material etc.),
  - Managing the provision of onsite services (venue, catering, interpretation)
  - Identification and invitation of participants and speakers
  - Presentations:
    - welcome and introduction speech, in collaboration with the ELRC representative (*S0.1 Welcome by the local organizers*)
    - presentation of the ELRC country-specific results (*S2.2 ELRC in [country X]*)
  - Reporting of the workshop
- Prepare to contribute to:
  - easing social concerns around data sharing
  - technical and/or legal questions (let's keep in mind the key questions that surfaced in the previous round)
  - choose and make available input data for MT demos (e.g. to help the DGT FO with the MT@EC demo, if need arises)

# Timeline (overall)

# Timeline (country-specific workshop)

# Workshop preparation

- **Step 0:** The ELRC regional representative (ELDA, ILSP, Tilde) will arrange country-specific webconferences to set the organisational issues in motion
- **Step 1:** Contact your local DGT Field Officer (as soon as possible)  
([http://ec.europa.eu/dgs/translation/getintouch/localoffices/offices\\_en.htm](http://ec.europa.eu/dgs/translation/getintouch/localoffices/offices_en.htm))
  - It is important to establish a good collaboration with him/her.
  - The workshop date should be set together with the DGT Local Field Officer and your ELRC representative taking into account the circumstances in the public service administration in your country.
  - However, do not overburden him/her
- **Step 2:** Set the date in agreement with the DGT Local FO (as soon as possible)
  - Ideally co-locate with relevant events attracting public sector representatives (or the LT community)
  - Please populate the [relevant\\_events.xlsx](#) file with events in your country

- **Step 3**: Start identifying participants (ideally 5 months before the event). Please note:
  - The main target audience of your workshop are public administrations (ministries, central authorities etc.) and online services stakeholders
  - In many countries the DGT local field officers have organised workshops on MT@EC → the participant lists from these workshops are very helpful. So, get public sector contacts from the DGT Local FO.
  - Try to have a balanced representation of local public sector (ministries, other organisations), internally (i.e. not all from one ministry) but also in relation to the 6 DSIs
  - Try to involve the country's experts and practitioners in the area of Open Data (local data.gov.x, EU Open Data Portal anchors, etc.)
- **Step 4**: Identify a venue large enough to host all participants of your workshop which also provides the opportunity for simultaneous interpretation (4 months before the event)
  - Ask your DGT local field officer if the premises of the DGT local field office / EU representation in your country can be used

- **Step 5:** Adapt the workshop agenda to the local context dynamics (who the speakers are going to be, why, etc.) (3 months before the event)
- **Step 6:** Finalise the list of speakers and invitees as soon as possible (ideally 3 months before the event)
- **Step 7:** Have the details of the workshop published on the ELRC website (localized agenda, registration form in local language)

- Step 1: A master invitation letter in EN will be made available to you
- Step 2: Translate/localize it in your language. The letter/email should contain the following pieces of information:
  - Date & venue
  - Contact person
  - A draft agenda (you may use the master agenda in EN if you do not have a draft one)
  - Online registration address from the ELRC website
  - Stress that the event is free-of-charge
- Step 3: Ask your ELRC representative to have the invitation letter signed by the European Commission (DG Connect or DGT)
- Step 4: You may set up a local email account from which the email will be sent
- Step 5: Send out the first round of invitations (8 weeks before the event)
- Step 6: Send out the second round of invitations (4 weeks before the event)

- Translate all master slides into local language
- Localise the country-specific information
- Ask the panelists for their presentations in advance (if they plan to use ppt)
  - Please note: Ensure the speakers' consent to publish the workshop presentation files on the ELRC website
- Provide all material (master slides in English + localised version + panelists' material) to the interpreters before the event, so that they know the content and the terminology
- Use large fonts and “light” slides - not too much content on each slide

- Registration form for onsite registration
- Badges for participants
- Speakers' consent form (if the event is video-recorded)
- Certification of attendance
  - Tip: hand out the certifications of attendance at the end of the event, when the filled in feedback forms are returned!

- ELRC is centrally taking care of all promotional material
- Make arrangements for any promotional material, so that everything is delivered at least three days before the event

- The information package for the ELRC workshop organisation includes
  - The master agenda of an ELRC workshop (in EN)
  - The draft invitation letter to an ELRC workshop (in EN)
  - The draft press release for an ELRC workshop (in EN)
  - The set of master slides for an ELRC workshop (in EN)
  - The ELRC feedback form for the workshop (in EN) to be completed by participants during/after the workshop
  - The ELRC engagement form (in EN) to be completed by participants during/after the workshop
  - The draft consent (if the event is to be video-recorded)
  - Internal and public report templates
  - Brochure template (in EN)
  - ELRC+ logos
