THE WORKSHOP CONCEPT AT A GLANCE

MARIA GIAGKOU, STELIOS PIPERIDIS (ILSP / ATHENA R.C.)

Virtual LRB meeting, 29.04.2020

CEF Automated Translation (CEF AT)

News and Upcoming Developments

NEWS AND UPCOMING DEVELOPMENTS

- CEF AT will make available **more multilingual language technology tools** in addition to the current eTranslation system

- eTranslation expanding its languages coverage to **non-European languages** of societal and/or financial importance
  - EN-RU already available, and more to come

- Widening of the CEF AT user base: in March 2020 eTranslation opened up to European SMEs

WORKSHOPS OBJECTIVES

WHAT ARE WE TRYING TO ACHIEVE?

OBJECTIVES

- Identify <u>public</u> digital services, administrations and organisations that could benefit from <u>multilingual services and from language technologies</u> in general.

- Identify complementarities and <u>synergies</u> between the national actors (<u>language technology providers</u>, specialised IT developers and language resource owners) and the CEF AT services to better satisfy the requirements of the public digital services and administrations.

- <u>Raise awareness</u> of the CEF AT multilingual services beyond the public sector, with a focus on <u>national SMEs</u> and international trade associations.

OBJECTIVES

- Remind of the need to identify and <u>gather relevant language resources</u> and tools of interest for the CEF AT platform.

- Continue to serve the ELRC objectives with regard to:
  - the sustainability and expansion of the ELRC network
  - provision of support to data holders
  - gathering of information for the situation in each particular country in terms of the adopted <u>language data creation and sharing infrastructures</u> (European Countries Profile).

A TITLE FOR THE WORKSHOPS?

Reshaping multilingual Europe: Language-centric Artificial Intelligence

WORKSHOP STRUCTURE

LT landscape
- Supply side
- Demand side

Language data
- Language data as fuel
- Investigation of existing practices for creating and sharing language data
