EUROPEAN COMMISSION

MEMO

Brussels, 6 May 2013

Smarter rules for safer food: Commission proposes landmark package to modernise, simplify and strengthen the agri-food chain in Europe

1) What is "from farm-to-fork" policy?

The EU "from farm-to-fork" policy covers legislation to **protect health** by ensuring that the food we produce and import that ends up on our plates is safe to eat. This body of legislation is a complex, integrated system of rules which takes care of all the links in the food chain from: the protection of plants from pests, the protection of animals and humans from animal diseases (and from such diseases which are transmissible to humans) and the protection of human health from all the hazards that might arise along the agri-food chain. It also includes all those rules which allow the Single Market to function smoothly in this area and provides rules for the protection of consumers.

Official controls are carried out at various stages in the food production chain by EU Member States to ensure that the legislation is being correctly applied.

Regional Development Strategies the key for local and regional governance

Press release 14/10/2019 | Fundamental rights and rule of law; Cohesion policy reform; Territorial cohesion; Urban policy; Cross-border and territorial cooperation; Multi-level governance and devolution

During the 136th European Committee of the Regions (CoR) Plenary, that took place on 7-9 October in Brussels, regional and local leaders delivered their recommendations for the preparation of the next generation of cohesion programmes, which set the basis for cohesion policy implementation for the 2021-2027 period. In the opinion on "Recommendations for the successful design of regional development strategies beyond 2020", drafted by Adam Struzik (PL/EPP), President of Mazovia Region, the CoR recognises the urgent need to develop a long-term policy framework at EU level to replace the Europe 2020 strategy.

Commuting in Poland — Results of the NSP 2011

Study commuting in 2011 for total employment was carried out on the basis of the data contained in the registers of the official statistics, the National Census in 2011 (NSP 2011). The methodology for this test is developed on the basis of previous work linked to the implementation of the "Migration population of employees in 2006." This time existing source of data for this subject (tax) was supplemented by resources other gestorów. The information delivered by these sources was made through the performance of work by sex and age and, in particular, allow a more accurate identification of territorial cohesion, jobs, which in combination with the actual place of residence of those persons to steer flows.

How to connect to eTranslation

- Individual users
 - **From 6 November 2019:** registration via <https://webgate.ec.europa.eu/etranslation/public/welcome.html>
- Web service integration
 - Technical documentation: <https://ec.europa.eu/cefdigital/wiki/display/CEFDIGITAL/How+to+submit+a+translation+request+via+the+CEF+eTranslation+webservice>
 - Contact help@cefat-tools-services.eu for credentials (and other support)
 - Adapt your service to multilingual use

- Statistical Machine Translation
 - MT@EC built only on "EU translations" (Euramis database)
 - Covers all 24 official EU languages
 - Euramis (and MT@EC) cover EU policies, subjects and language but limited everyday language
 - Moses-based engines
 - Performs best when trained on **large volumes** of text pairs (source-translated) in **specific domains**

What is NMT?

- Machine learning: artificial neural networks trained on existing translations
- The computer devises its own rules on how to translate
- Radical departure from the phrase-based SMT approaches

Why is it important?

- Translations read better: more fluent and grammatical
- Better able to fill in gaps in data used for training
- Better for highly inflected languages (e.g. German, Hungarian)

This is where the field is headed

- Will SMT become obsolete?

SMT vs NMT – different types of errors

Original (excerpt from “Maltese: From survival to revival” by Mark Vella; DGTnet):

Maltese has survived and flourished through those ages, despite being essentially an unwritten language for centuries – but with a long-standing oral tradition that we are still studying and discovering.

SMT:

Il-Malti ssopravvew u ffjorixxa permezz ta’ dawn l-etajiet, minkejja li hija essenzjalment mhux miktuba — iżda b’lingwa li ilha teżisti għal sekli sħaħ it-tradizzjoni orali li għadhom jistudjaw u jiskopru.

NMT:

Il-Maltin għexu u ffjorixxew f’dawk l-etajiet, minkejja li huma essenzjalment lingwa mhux miktuba għal sekli sħaħ — iżda bi tradizzjoni orali twila li għadna qed nistudjaw u niskopru.

SMT vs NMT – different types of errors

Original (excerpt from “Maltese: From survival to revival” by Mark Vella; DGTnet):

Malta's accession to the EU in 2004 also meant the culmination of years of struggle for Maltese to earn its rightful place as the country's national language.

SMT:

Malta ssieħbet fl-UE fl-2004 fissret ukoll il-qofol ta' sena ta' taqbid għall-Malti jaqilgħu l-post li jistħoqqilha bħala lingwa nazzjonali tal-pajjiż.

NMT:

L-adeżjoni ta' Malta mal-UE fl-2004 kienet tfisser ukoll il-quċċata ta' snin ta' għlieda għall-Malti li jikseb il-post legittimu tiegħu bħala l-lingwa nazzjonali tal-pajjiż.

SMT vs NMT – different types of errors

Original (excerpt from “Maltese: From survival to revival” by Mark Vella; DGTnet):

The chequered travails of the Maltese language are a true example of European multilingualism, illustrating the dignity of different nations’ tongues — the story of how cultures and their languages can meld harmoniously.

SMT:

Li jalternaw travails tal-lingwa Maltija huma eżempju ta’ veru ta’ tal-multilingwiżmu Ewropew, li juru d-dinjità ta’ nazzjonijiet differenti” ilsna — l-istorja ta’ kif tal-kulturi u l-lingwi tagħhom jistgħu meld armonjożament.

NMT:

It-Trigi li għaddew minn użu tal-lingwa Maltija huma eżempju veru tal-multilingwiżmu Ewropew, li juri d-dinjità ta’ lingwi differenti ta’ nazzjonijiet differenti — l-istorja ta’ kif il-kulturi u l-lingwi tagħhom jistgħu jagħmlu b’mod armonjuż.

L-għadd totali ta' emissjonijiet ta' gassijiet serra koperti bid-Deciżjoni 406/2009/KE għal kull Stat Membru għall-2014 li ġejjin mid-dejta kkoreġuta tal-inventarju wara li tlesta r-rieżami komprensiv imsemmi fl-Artikolu 19(1) tar-Regolament (UE) Nru 525/2013 huwa stabbilit fl-Anness ta' din id-Deciżjoni.

Language resources: the key to success

- 
- More data for all languages
 - Better lexical coverage for all languages
 - Machine translation adapted to your domain/subject matter

Possible Future Improvements

- 
- Better translation quality
 - More file formats
 - Engines for texts outside the EU domain
 - New languages (RU, ZH, AR, JP)

eTranslation brings...

- Reliable and trustworthy translation for EU and Member State public administrations
- Support for languages with fewer speakers (multilingualism policy)
- Opportunities for private sector (eTranslation integration)
- A higher profile for language technologies, thus fostering demand
- Public availability of data collected by ELRC

Solve your language problems!
