EUROPEAN COMMISSION

MEMO

Brussels, 6 May 2013

Smarter rules for safer food: Commission proposes landmark package to modernise, simplify and strengthen the agri-food chain in Europe

1) What is "from farm-to-fork" policy?

The EU "from farm-to-fork" policy covers legislation to **protect health** by ensuring that the food we produce and import that ends up on our plates is safe to eat. This body of legislation is a complex, integrated system of rules which takes care of all the links in the food chain from: the protection of plants from pests, the protection of animals and humans from animal diseases (and from such diseases which are transmissible to humans) and the protection of human health from all the hazards that might arise along the agri-food chain. It also includes all those rules which allow the Single Market to function smoothly in this area and provides rules for the protection of consumers.

Official controls are carried out at various stages in the food production chain by EU Member States to ensure that the legislation is being correctly applied.

The screenshot shows the N-Lex portal interface. At the top, there is a navigation bar with the N-Lex logo and the tagline "A common gateway to National Law". To the right of the logo, there are links for "About N-Lex", "Help", "Legal notice", and "Write to us", along with a language dropdown menu set to "English". Below the navigation bar, a breadcrumb trail reads "EUROPA > EU law and publications > EUR-Lex > N-Lex". The main content area is titled "NATIONAL LAW" and includes a brief description: "N-Lex provides a single entry point to the national law databases on individual EU countries. Choose one of the countries below to search for legal acts or find out more about its legal system. Select **Multi-database search** to search in more than one country at a time." Below this text is a grid of buttons, each representing a country with its flag and name: Belgium, Bulgaria, Czech Republic, Denmark, Germany, Estonia, Greece, Spain, France, Croatia, Ireland, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, Netherlands, Austria, Poland, Portugal, Romania, Slovakia, Slovenia, Finland, and Sweden. At the bottom right of the grid is a "Multi-database search" button with a small icon of colored squares.

Machine-to-machine service eTranslation on the European Data Portal

The screenshot shows the European Data Portal homepage. At the top, there is a navigation bar with links for Newsletter, FAQ, Search, Contact, Cookies, Legal notice, and Login. A language dropdown menu is set to English (en). A search bar is located on the right side of the header.

Below the header, a main navigation menu includes: Home, What we do, Data, Providing Data, Using Data, and Resources.

The central section features a "Search Datasets" box with a text input field labeled "Enter keywords..." and a "Search" button. Below this is a "SPARQL Search" option. To the right of the search box is a map of Europe with various national flags pinned to different locations.

Underneath the search section is a "Browse Datasets by Categories" grid with 15 categories, each represented by an icon and a text label:

- Agriculture, Fisheries, Forestry & Foods
- Energy
- Regions & Cities
- Transport
- Economy & Finance
- International Issues
- Government & Public Sector
- Justice, Legal System & Public Safety
- Environment
- Education, Culture & Sport
- Health
- Population & Society
- Science & Technology
- Catalogues
- All data

On the right side of the page, there is a "Latest News" section with three news items:

- Connecting Europe Facility Telecom/2017-3 call launched!** (28/06/2017)
- SEMIC 2017 Conference followed by more than 1100 participants** (28/06/2017)
- Slovakia approves ICT standards guide** (03/07/2017)

At the bottom of the news section, there is a link for "(Open) Data competitions in Spain" (30/06/2017) and an RSS feed icon.

The screenshot shows a search interface on the European Data Portal. The search bar contains the Greek text "απογραφή πολωνία", which is circled in red. Below the search bar, the results are displayed as a list of datasets. The first result is titled "Methodology for migration abroad in the national population and housing ..." and includes a PDF icon. The second result is titled "Commuting in Poland — Results of the NSP 2011" and also includes a PDF icon. The third result is titled "Geostatystyczny portal" and includes a PDF icon. The fourth result is titled "Foreign migration testing methodology in the national population and hou...". On the left side of the interface, there is a map and a list of countries with their respective dataset counts.

Commuting in Poland — Results of the NSP 2011

Study commuting in 2011 for total employment was carried out on the basis of the data contained in the registers of the official statistics, the National Census in 2011 (NSP 2011). The methodology for this test is developed on the basis of previous work linked to the implementation of the "Migration population of employees in 2006." This time existing source of data for this subject (tax) was supplemented by resources other gestorów. The information delivered by these sources was made through the performance of work by sex and age and, in particular, allow a more accurate identification of territorial cohesion, jobs, which in combination with the actual place of residence of those persons to steer flows.

 - Adapt your service to multilingual use!

- Statistical Machine Translation
 - MT@EC built only on "**EU translations**" (Euramis database)
 - Covers all 24 languages
 - Euramis (and MT@EC) cover EU policies, subjects and language but **limited everyday language**
 - Moses-based engines
 - Performs best when trained on **large volumes** of text pairs (source-translated) in **specific domains**

What is NMT?

- Machine learning: artificial neural networks trained on existing translations
- The computer devises its own rules on how to translate
- Radical departure from the phrase-based SMT approaches

Why is it important?

- Translations read better: more fluent and grammatical
- Better able to fill in gaps in data used for training
- Better for highly inflected languages (e.g. German, Hungarian)

This is where the field is headed

- Will SMT become obsolete?

By end 2018

Original Text (EU Commission Press Release, 10 April 2018):

With an average of 49 road fatalities per one million inhabitants, European roads remained by far the safest in the world in 2017. Compared to 2016, Estonia and Slovenia reported the largest drop in fatalities with respectively -32% and -20%.

MT@EC (SMT):

Met een gemiddelde van 49 het aantal verkeersdoden per miljoen inwoners, bleef de Europese wegen veruit de veiligste in de wereld in 2017. ten opzichte van 2016, Estland en Slovenië de grootste daling van het aantal verkeersdoden met respectievelijk -32 % en -20 %.

Neural Machine Translation:

Met gemiddeld 49 verkeersdoden per miljoen inwoners bleven de Europese wegen in 2017 verreweg de veiligste ter wereld. Vergeleken met 2016 rapporteerden Estland en Slovenië de grootste daling van het aantal dodelijke slachtoffers, met respectievelijk -32% en -20%.

Original Text (EU Commission Press Release, 28 May 2018):

The European Commission is proposing new EU-wide rules to target the 10 single-use plastic products most often found on Europe's beaches and seas.

MT@EC (SMT):

La Commission européenne propose de nouvelles règles à l'échelle de l'UE 10 pour cibler les produits en plastique à usage unique les plus fréquemment trouvés sur les plages et les mers de l'Europe.

eTranslation (NMT):

La Commission européenne propose de nouvelles règles à l'échelle de l'UE pour cibler les 10 produits en plastique à usage unique que l'on trouve le plus souvent sur les plages et les mers d'Europe.
