Romania ranks 28th in DESI 2017. Romanians benefit from coverage of fast broadband connections in urban areas, which translates into the second highest share of subscriptions in the EU. The take-up of mobile broadband is also accelerating. However, the rate of digitisation of the economy, including for public services, and the levels of digital skills are still low.

1 Connectivity	Fixed Broadband, Mobile Broadband, Broadband speed and prices
2 Human Capital	Basic Skills and Internet Use, Advanced skills and Development
3 Use of Internet	Citizens' use of Content, Communication and Online Transactions
4 Integration of Digital Technology	Business digitisation and eCommerce
5 Digital Public Services	eGovernment

Clustering: Romania belongs to the cluster of low performing countries.

Methodological note

¹ **DESI 2016** was re-calculated for all countries to reflect slight changes in the choice of indicators and corrections to the underlying indicator data. As a result, country scores and rankings may have changed from the previous publication.

² **4G coverage**: This is a new DESI indicator measuring the average coverage of telecom operators' 4G networks.

³ **Spectrum**: There is a decrease in most of the Member States due to the additional EU harmonisation of the 700 MHz band in April 2016.

⁴ **Fixed Broadband Price**: Due to a slight methodological change, historical data was re-calculated.

⁵ **ICT Specialists**: Historical data have been revised by Eurostat.

⁶ **Music, Videos and Games**: Break in series due to a change in the Eurostat survey.

⁷ **Video on Demand**: Break in series due to a change of data source. New source is Eurostat.

⁸ **Open Data**: Change of data source. The historical data have also been restated. The new source is the European Data Portal.
