

ELRC Workshop in Romania

CEF in Romania: an outlook into current and future challenges

e-Justice perspective

Razvan CRACIUNESCU
IT Specialist, RO Ministry of Justice

- European e-Justice Portal – one of the Digital Service Infrastructures (DSI) financed by the Connecting Europe Facility (CEF) – Telecommunications (Telecom) Sector
- European e-Justice Portal 2018 call: €4 m EUR (2018)
- Currently CEF Telecom 2018-4 call opened (until 22.11)
- Call Objectives:
 - e-Evidence - allow competent national authorities to join the e-Evidence Digital System
 - Insolvency Registers Interconnection - allow competent public authorities to ensure compliance with Regulation (EU) 2015/848
 - ...

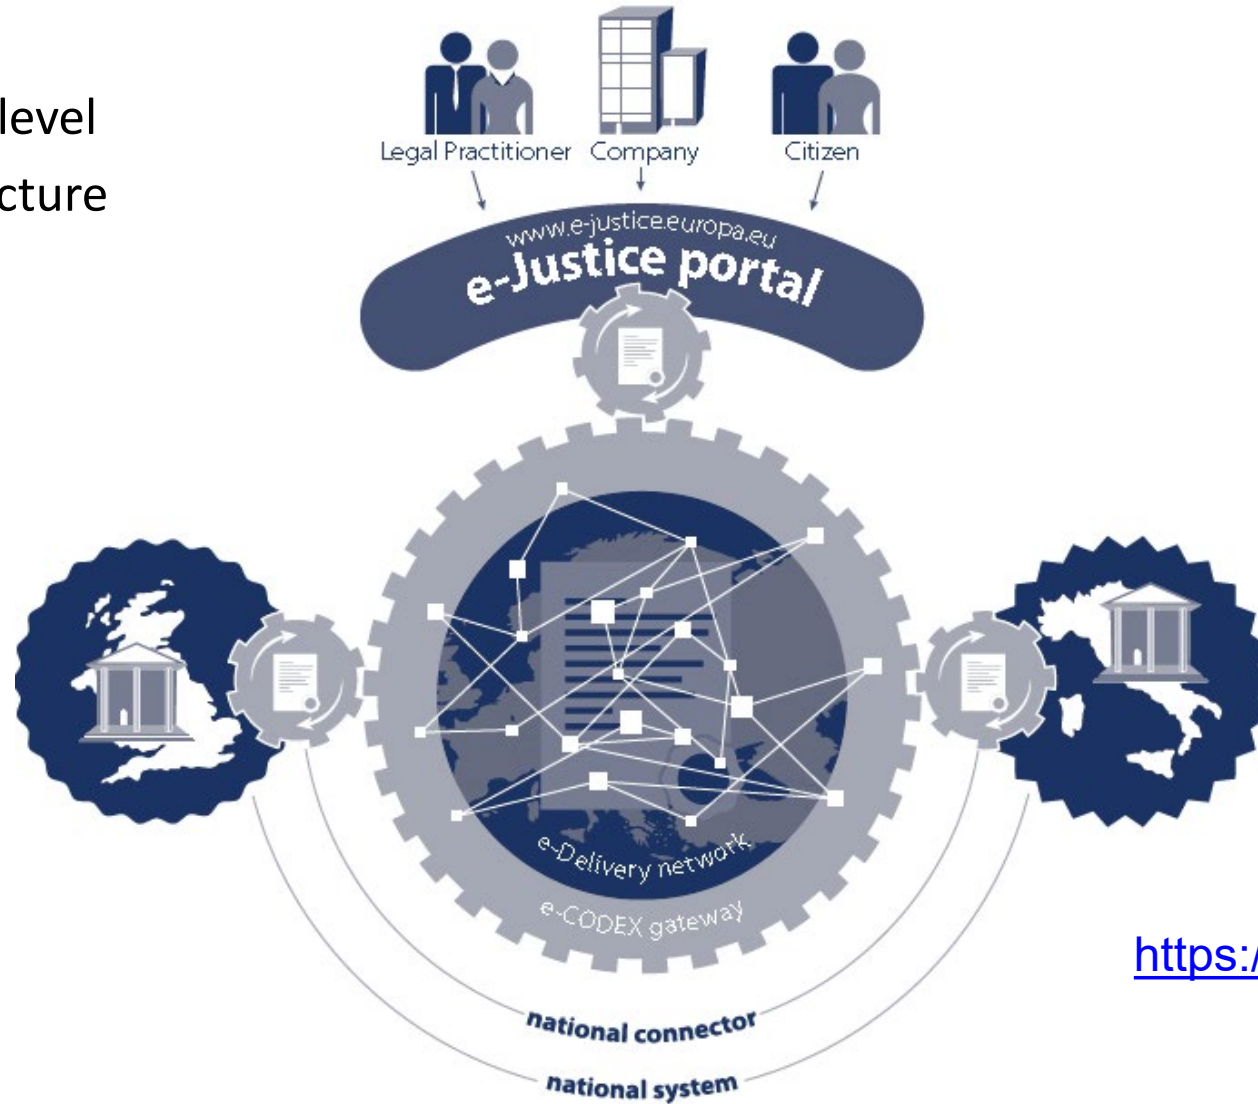

- Call Objectives (cont.):
 - Access to e-CODEX - Connect courts to the Portal via e-CODEX to support the European Payment Order and Small Claims procedures
 - Integration of multilingual standard forms - Supports the implementation of Regulation (EU) 2016/1191 (Public Documents Regulation); aims to allow national authorities to deploy appropriate IT solutions using common standards
- In scope: work necessary to achieve the connection
- Out of scope: work necessary to create something to connect (e.g., establishing national registers, case management systems, non-connection related hardware/software)

- e-CODEX is providing a fast, easy and reliable connection between legal professionals across Europe, so they can efficiently and effectively handle cross border legal cases in a digital manner
- e-CODEX interlinks national and European IT systems in the e-Justice domain: a fast and secure legal communication is being established through a decentralised network of e-CODEX access points.
- Pilot implementations of cross-border instruments based on EU Regulations (e.g. European Payment Order, Small Claims etc.) or Registers' interconnections (e.g. nat. Business Register – BRIS)

e-CODEX high-level system architecture

<https://www.e-codex.eu/>

- one-stop-shop for European e-Justice
- The Portal's objective - to contribute to the creation of a European judicial area by leveraging ICT to facilitate access to justice and enable electronic cross-border judicial proceedings and judicial cooperation.
- The European e-Justice Portal - from being a provider of information to being a provider of services in the judicial area.

Welcome to the BETA version of the European e-Justice Portal

We hope you will enjoy it. Please leave your comments via the yellow menu on the left hand side.

The BETA Portal is being updated and improved daily. Both the current and BETA versions of the Portal will run in parallel until the end of 2018.
